

## EB-50

### Centralised Controller

One of the most advanced energy monitoring centralised controllers available, the EB-50 allows complete control from one location.

The EB-50 is the next generation of centralised control incorporating the following elements and key features:

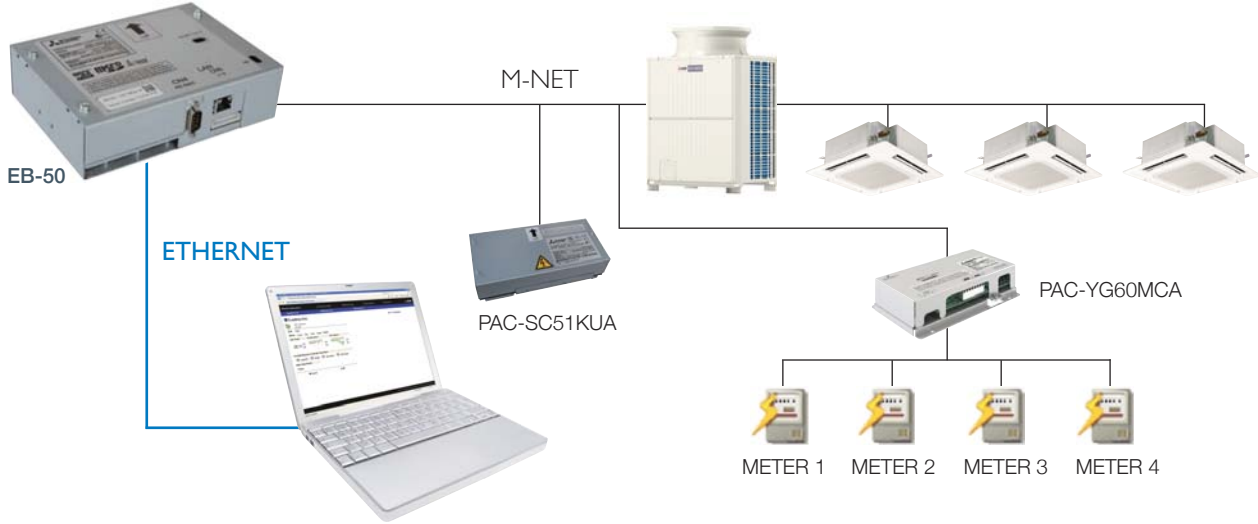

#### Key Features

- Web based control and monitoring of up to 50 groups
- Ethernet port enables connection to BEMS interfaces
- Energy monitoring of multiple air conditioning systems
- Energy data stored on controller to enable historical trend analysis
- Graphical representation of energy use
- Scheduling and night setback
- Energy consumption targets
- Downloadable energy data files
