The MSZ-LN wall mounted system

A blend of energy efficiency and sophisticated design

Finished with a range of deep, rich colours and a premium quality feel

Stylish, colour coordinated remote controllers

Mobile control and monitoring of your Mitsubishi Electric systems

MELCloud is a cloud based solution for controlling and monitoring your Mitsubishi Electric air conditioning or heating systems either locally or remotely by PC, tablet or smartphone app. It offers the ability to control which units are on/off, temperature settings, the 7 day weekly schedule, frost protection settings, holiday mode and also log and record errors.

Ensuring total flexibility from a single device, from any worldwide location, the MELCloud app also provides localised information like weather forecasts and customer service contact details. The MSZ-LN models are the first in our air conditioning range to come with the Wi-Fi interface needed to connect to MELCloud built into the unit as standard.

i-see infrared sensor and double vanes provide enhanced comfort and energy savings

30°C

22°C

Low  High

i-see Sensor

The i-see Sensor provides customised comfort by automatically monitoring room occupancy, position and body temperature.

Double Vanes

Double vanes operate independently to distribute airflow evenly throughout the room.

Dual-Barrier Coating

Mitsubishi Electric's proprietary coating prevents dust and grease accumulation.

- Grease mist
- Cigarette smoke

- Dust
- Dirt

- Dual Barrier Coating used in:
- Heat exchanger
 - Fan
 - Air duct

Plasma Quad Plus Filter

Uses powerful plasma technology to filter out even microscopic particles.

Plasma Quad Plus

Bacteria

Viruses

Allergens

Dust

Moulds

Microparticle
(PM2.5)

Built using micron-precise calculations, the compressor is the heart of the MSZ-LN air conditioning system

Poki-Poki Motor

Dramatically enhanced motor efficiency utilising Mitsubishi Electric's original dense winding technology.

Heat Caulking

Mitsubishi Electric's heat caulking method minimises cylinder distortion for even greater efficiency.

Designed to provide powerful heating,
even on bitterly cold or snowy days

Solutions that address the ban on R22 refrigerant

As of 1st January 2015 it became illegal to use R22 refrigerant^{*1} to service and maintain air conditioning units, yet there are a large number of systems still in use in the UK that rely on R22.

Many of these building operators remain unaware that whilst their air conditioning will not be illegal to run, it may need immediate replacement if it requires maintenance involving any degassing of the system.

The continual rise in energy costs also means everyone involved in the built environment is focusing on energy use and consumption and this is where modern equipment can really help to support replacement.

The MSZ-LN models incorporate our unique '**Replace Technology**' which allows the upgrade of systems using existing pipe work, without the need to apply any special cleaning machines.

^{*1} The EC Ozone Regulation (No.1005/2009) was introduced to control and phase out the remaining uses of all Ozone Depleting Substances (ODS) such as R22 refrigerant. This has led to a total ban on its use for service and maintenance by the start of the year 2015. ODS can result in greater UV radiation reaching the earth's surface which is harmful for humans, animals and plants, leading to increases in skin cancer, cataracts and a reduction in food crop yields. Modern alternatives such as HFC's, which include R32, do not have the same ozone depleting potential (ODP).

Note: The fuse rating is for guidance only. Please refer to the relevant databook for detailed specification. It is the responsibility of a qualified electrician/electrical engineer to select the correct cable size and fuse rating based on current regulation and site specific conditions. Mitsubishi Electric's air conditioning equipment and heat pump systems contain a fluorinated greenhouse gas, R410A (GWP:2088), R32 (GWP:675), R407C (GWP:1774) or R134a (GWP:1430). *These GWP values are based on Regulation (EU) No 517/2014 from IPCC 4th edition. In case of Regulation (EU) No.626/2011 from IPCC 3rd edition, these are as follows. R410A (GWP:1975), R32 (GWP: 550), R407C (GWP:1650) or R134a (GWP:1300).
