Market leading solutions to **cool**, **heat**,
ventilate & **control** the nation's buildings

M&E Edition

les.mitsubishielectric.co.uk

Welcome to **Mitsubishi Electric**

Mitsubishi Electric is a market leader in providing solutions to cool, heat, ventilate and control our buildings.

As a major manufacturer of some of these pivotal technologies, we hold the UK's energy challenges close to our heart. We want to help the nation achieve its climate goals; we want to help individuals and businesses reduce the energy consumption of their buildings, whilst also helping to reduce their annual running costs.

At Mitsubishi Electric, we are constantly evolving and today our areas of expertise go way beyond the advanced air conditioning systems that formed the foundation of our business. Here in the UK, we provide advanced solutions that cool, heat, ventilate and control buildings in the most energy efficient and cost-effective ways possible. Through technical expertise, experience and an innovative product range, we enable buildings everywhere to significantly improve energy efficiency, reduce running costs and adhere to increasingly tough legislation. **We also provide a variety of additional services and benefits to our customers which include:**

- **Product training and technical support**
- **CPD guides and presentations**
- **Apps and tools**
- **Contractor Partner Programme**
- **Design and consultancy services**

Working towards a better use of energy in buildings

Mitsubishi Electric's global framework for realising a sustainable planet - **Environmental Sustainability Vision 2050** - is translated in the UK into our **Green Gateway philosophy**, which is central to the way we do business. With this initiative, we are seeking to use our position as a manufacturer of key technologies to increase awareness and improve energy use in the built environment.

By constantly challenging everyone involved to combat the issues we all face and encouraging constructive dialogue throughout the industry, we aim to help everyone address their energy use and to work towards a more sustainable future. Working within the construction industry in this way we are continually developing energy efficient cooling, heating and ventilation solutions - all managed by the most advanced control systems available.

Commercial Heat Pumps & Chillers

A new generation of energy saving
and innovative technology

Contents

The Innovative **Commercial Heat Pump & Chiller Range**

Mitsubishi Electric has developed a range of heat pumps and chillers specifically designed for heating and cooling commercial buildings.

The Ecodan® range provides renewable heating, challenging traditional heating solutions, whilst meeting the energy and carbon reduction demands of today and beyond. At the same time the e-Series modular chiller range provides a low-carbon, flexible and cost effective option, allowing up to six individual units to be connected together to provide a system capacity from 150kW to 1,080kW, in either cooling only or heat pump options.

In 2015 Mitsubishi Electric purchased Climaveneta, enhancing our product line up and marking our full scale entry into the chiller market.

Climaveneta is a strong European brand, supported by 45 years of customer trust and high quality production. Its range of energy-saving, low-noise and innovative heat pump and chiller technology further expands the application and customisation capabilities we are now able to offer.

Through our technical expertise, long experience and innovative product range, we enable building operators everywhere to significantly improve energy efficiency, reduce running costs and adhere to increasingly tough legislation.

We believe that global climate challenges need local solutions. Our aim is to help individuals and businesses reduce the energy consumption of their buildings and their running costs.

INTEGRA

CLIMAVENETA

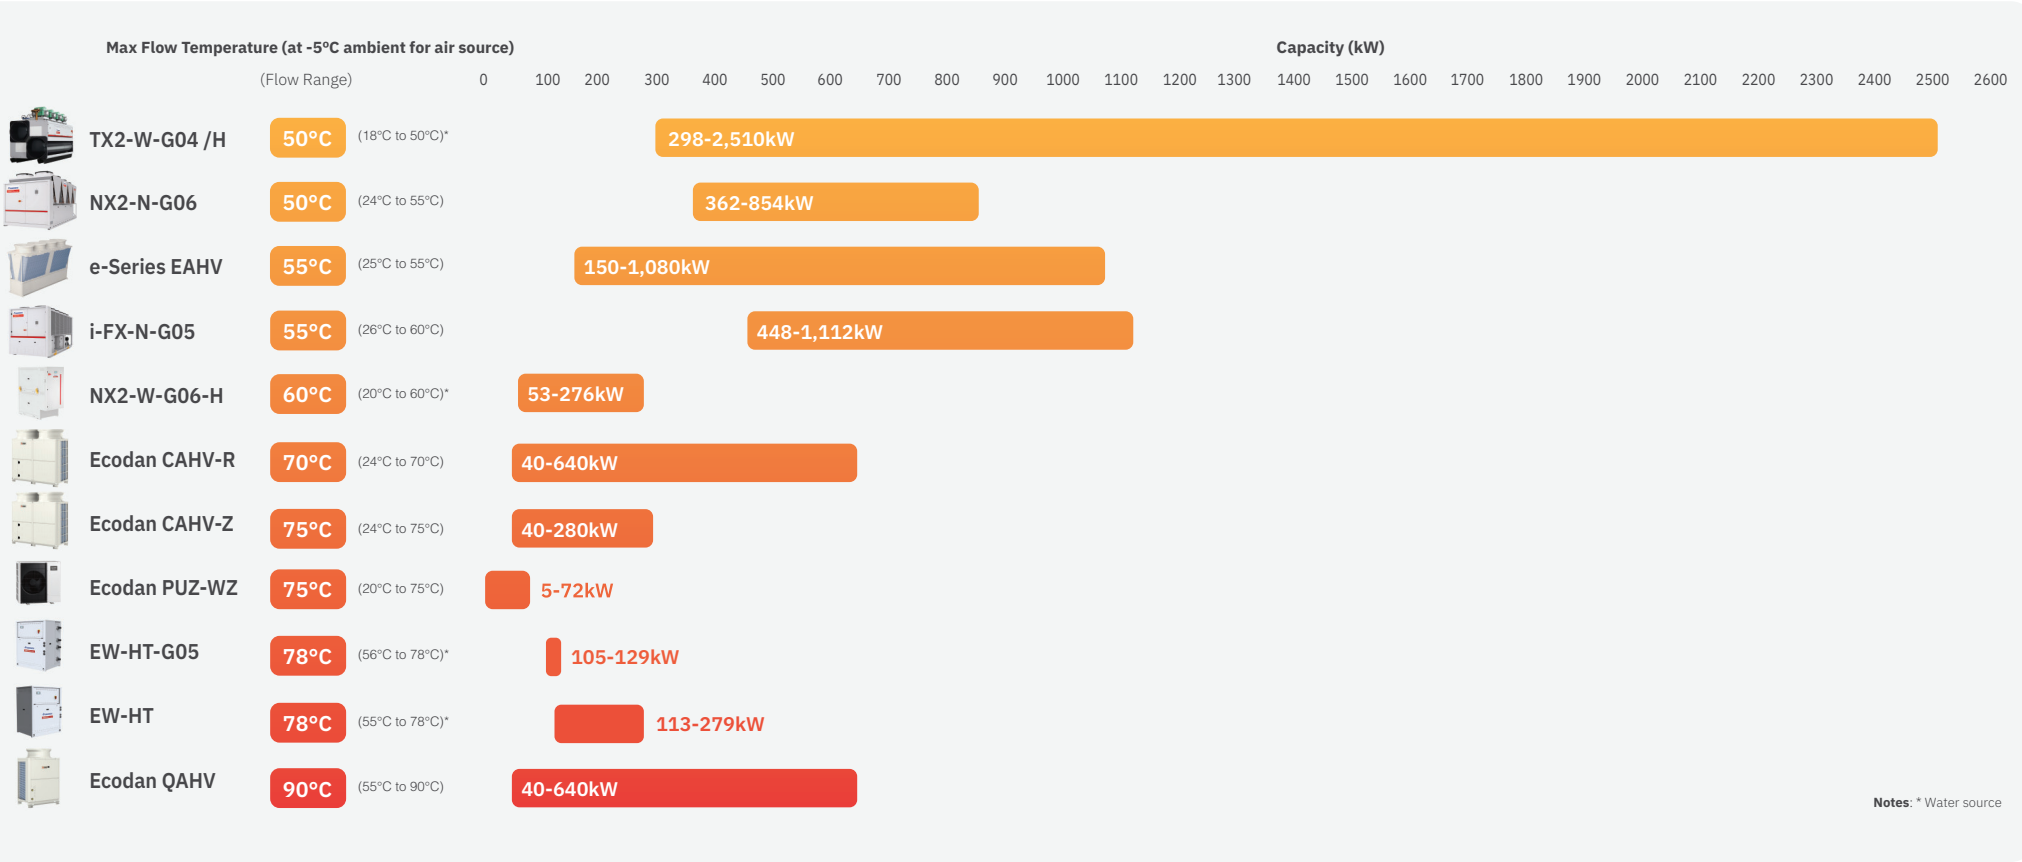
Our Commercial Heating range at a glance

The range of heat pumps on the market is now wider than it ever has been. This means it's possible to select exactly the right equipment for the specific application. Our commercial heat pumps fall into three broad ranges:

Mitsubishi Electric - Modular heat pumps manufactured to the highest quality standard, and suitable for a range of different applications.

Climaveneta - Commercial heat pumps that use a wide range of low and lower GWP refrigerants, alongside the latest fixed speed/inverter scroll and screw compressors.

Ecodan - A range of renewable heat pumps that efficiently and reliably generate sustainable space heating and hot water all year round.



ecodan®

Hydrodan EHWT17D-MHEDW R32 Water to Water Heat Pump

Certificate Number: 037-0101-22
Product (Type): Heat Pumps (Water/Water)
Product Reference: EHWT17D-MHEDW

The **Ecodan Hydrodan** is a water to water heat pump, designed to produce heating and hot water in residential apartments, and connect to a 5th generation ambient temperature heat network deployed throughout the building. The use of these networks helps to reduce overheating in apartments and also produces negligible distribution losses. The local heat network can be maintained at ambient temperature by a Mitsubishi Electric commercial heat pump, environmental source or connected to a district heat network.

Key Features & Benefits

- Removable heat pump module - simple for repairs
- Highly efficient heating and hot water production - low running costs for owners
- Low quantity R32 refrigerant - low environmental impact
- PIC valve network control - simple pressure balancing and flow control
- Ultra-low noise output - no disturbance for owners

F	Ambient loop flow connection	28 mm/Compression
G	Electrical cable inlets 	For inlets 1 and 2 , run low-voltage wires including external input wires and thermistor wires. For inlets 3 , 4 and 5 , run high-voltage wires including power cable, and external output wires. *For a wireless receiver (option) cable and ecodan Wi-Fi interface (option) cable, use inlet 1 .

e-series

EAHV R32 Modular Air Source Heat Pump

(150 to 1,080kW)

The R32 e-Series **EAHV** range allows for up to 6 individual units to be connected together to provide a system capacity from 150kW to 1,080kW. Using this modular approach reduces space requirements and simplifies lifting and installation.

Key Features & Benefits

- Highly efficient inverter scroll compressors
- Modular to maximise space saving
- Y-shaped heat exchangers allow for a greater surface area, maximising efficiency, whilst also keeping the units much narrower than conventional heat pumps

Notes:

1. Under normal cooling conditions at outdoor temp 35°CDB/24°CWB (95°FDB / 75.2°FWB) outlet water temp 7°C (44.6°F) inlet water temp 12°C (53.6°F). Pump input is not included in cooling capacity and power input.
2. Under normal cooling conditions at outdoor temp 35°CDB/24°CWB (95°FDB/75.2°FWB) outlet water temp 7°C (44.6°F) inlet water temp 12°C (53.6°F). Pump input is included in cooling capacity and power input based on EN14511.
3. Under normal heating conditions at outdoor temp 7°CDB/6°CWB (44.6°FDB/42.8°FWB) outlet water temp 45°C (113°F) inlet water temp 40°C (104°F). Pump input is not included in heating capacity and power input.
4. Under normal heating conditions at outdoor temp 7°CDB/6°CWB (44.6°FDB/42.8°FWB) outlet water temp 45°C (113°F) inlet water temp 40°C (104°F). Pump input is included in heating capacity and power input based on EN14511.
5. The unit is delivered fully charged with refrigerant. No additional refrigerant is required.
6. IPLV is calculated in accordance with AHRI 550-590.
7. This value is not certified by Eurovent.

*Please don't use the steel material for the water piping.
*Please always make water circulate, or pull the circulation water out completely when not in use.
*Please do not use groundwater or well water in direct.
*The water circuit must be closed circuit.
*Due to continuous improvement, the above specifications may be subject to change without notice.
*This model doesn't equip with a pump.

ecodan®

CAHV-Z R290 Air Source Heat Pump

The Mitsubishi Electric Ecodan **CAHV-Z** delivers powerful, low-carbon heating and hot water using ultra-low R290 GWP refrigerant.

Perfect for a wide range of commercial applications such as schools and hospitals, it can operate as a standalone unit or in scalable multi-unit systems. In a multi-unit setup, units cascade and rotate to meet demand, with a 7-unit system delivering up to 280kW* of efficient, reliable heating and hot water all year round.

* At nominal conditions A7W45

Key Features & Benefits

- Ultra-Low GWP R290 Refrigerant - Reduces embodied carbon, helping future-proof projects and support ambitious CSR and sustainability targets
- High-Temperature Heating Performance - Delivers water temperatures up to 75°C, even at -15°C ambient, ensuring reliable comfort in demanding conditions
- Scalable Cascade Control - Multiple units can be combined and managed in cascade, providing maximum design freedom for a wide range of applications
- Wide Water Temperature Range Without Boost Heaters - Supplies 24°C -75°C flow temperatures without electric boosters, reducing energy consumption, running costs, and system complexity
- Rapid Defrost Operation - Minimises system downtime during defrost, helping maintain consistent heating performance in cold conditions
- Integrated R290 Safety Features - Built-in leak detection and an explosionproof relay support safe, compliant operation alongside peace of mind
- Quiet, Adaptable Operation - Low Noise Mode that minimises sound levels, and External Static Pressure Control allows flexible system design
- Anti-Simultaneous Defrost Control - Prevents full system shutdown during defrost cycles, ensuring continuous heating delivery

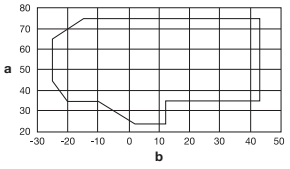
	Outlet	mm (in)	40A, Rc 1-1/2B
EXTERNAL FINISH			Acrylic painted steel sheet <Munsell 5Y 8/1 or similar>
EXTERNAL DIMENSIONS (Width x Depth x Height)		mm	1750 × 740 x 1710
NET WEIGHT		kg	363
DESIGN PRESSURE	R290	MPa	3.85
	Water	MPa	1.0
HEAT EXCHANGER	Water-side		Copper brazed stainless steel sheet
	Air-side		Plate fins and copper tubes
COMPRESSOR	Type		Inverter scroll hermetic compressor
	Manufacturer		Mitsubishi Electric Corporation
	Starting method		Inverter
	Motor output	kW	10.8
	Lubricant		PZ46M
FAN	Air flow rate	L/s	2500 × 2
	External static pressure / External static pressure mode		10 Pa (1 mm H2O) / 40 Pa (4 mm H2O)
	Type and quantity		Propeller fan × 2
	Control and driving mechanism		Inverter control, direct driven by motor
	Motor output	kW	0.92 × 2
HIC (Heat Inter-Changer) CIRCUIT			Copper pipe
PROTECTION DEVICES	High pressure		High-pressure sensor and switch set at 3.85 MPa
	Inverter circuit		Overheat and overcurrent protection
	Compressor		Overheat protection
	Fan motor		Thermal switch
DEFROSTING METHOD			Auto-defrost mode (Reversed refrigerant cycle)
REFRIGERANT	Type and factory charge	kg	R290, 4.8 kg
	Flow and temperature control		LEV and HIC circuit

Notes:

*1 Under normal heating conditions at the outdoor temperature of 7°CDB/6°CWB, the outlet water temperature of 45°C, and the inlet water temperature of 40°C.
*2 Under normal heating conditions at the outdoor temperature of -5°CDB/-6°CWB and the outlet water temperature of 55°C.
*3 Under normal heating conditions at the outdoor temperature of 7°CDB/6°CWB through the dry NC-contact.
*4



a: Outlet water temp. (°C)
b: Outdoor temp. (°C)
Keep inlet water temp. of 19°C or higher during the unit operation.

*5 The unit can operate at the water volume range of 1.5 - 4.0m^3/h if the water volume exceeds 4.0m^3/h during defrost cycle. The defrost signal is output from the terminal block of the unit.
*6 SPL is the value measured in an anechoic room at 1m away from the unit and 1.5m above the floor.
*7 Under conditions with maximum compressor frequency and fan rotated speed.

CAHV-R R454C Air Source Heat Pump

The Mitsubishi Electric Ecodan **CAHV-R** air source heat pump utilises low GWP R454C refrigerant, offering a robust, low carbon system for the provision of sanitary hot water and space heating. This innovative heat pump solution can operate as a single system or form part of a multiple unit system, making it suitable for a wide range of commercial applications, including schools and hospitals.

A multiple unit system has the ability to cascade available units on and off to meet the load requirements of a building. As an example of this unique modulation, a 16 unit system allows 0.5kW increments of capacity, from 7.9kW all the way up to 640kW*. With cascade and rotation built in as standard, the Ecodan CAHV-R is perfectly set up to reliably generate sustainable space heating and hot water all year round.

Key Features & Benefits

* At nominal conditions A7W45

- Low GWP R454C refrigerant and reduced embodied carbon helps achieve CSR targets
- Achieves 70°C outlet temperature down to -20°C ambient temperature for continuous heating provision
- Multiple unit cascade control from 7.8kW to 640kW* capacity provides design flexibility
- Water flow temperatures from 24°C to 70°C without boost heaters, results in cost and energy savings
- Advanced heat exchange design combined with the properties of R454C refrigerant enables a shorter defrost time

QAHV R744 Air Source Heat Pump

Specifically designed for commercial sanitary hot water application, where gas boilers, combined heat and power systems (CHP) or electric water heating have been traditionally utilised, the 40kW Ecodan **QAHV** provides a low carbon solution for hotels, apartment blocks, leisure centres, hospitals, care homes, restaurants and education.

Utilising the natural and stable refrigerant CO_2 (R744), the environmentally clean solution enables compliance to strict local planning laws and boosts BREEAM points. With the increasing decarbonisation of the electrical grid, the QAHV provides a high efficiency, low carbon hot water delivery solution with leaving water temperature up to 90°C.

Key Features & Benefits

- High efficiency at high flow temperatures
- Utilises CO_2 refrigerant which has a GWP of 1
- Uses a unique twisted and spiral gas cooler to enhance energy efficiency
- Full heating capacity down to -3°C outdoor temperature and operates down to -25°C
- Super low noise levels
- Able to utilise with an indirect system

Notes:

1. Under Normal heating conditions at the outdoor temp, 16°CDB/12°CWB, the outlet water temperature 65°C, and the inlet water temperature 17°C
2. Under Normal heating conditions at the outdoor temp, 7°CDB/6°CWB, the outlet water temperature 65°C, and the inlet water temperature 9°C
3. Under Normal heating conditions at the outdoor temp, 7°CDB/6°CWB, the outlet water temperature 65°C, and the inlet water temperature 15°C
4. Measured 1m from the front of the unit in an anechoic room
5. MCB Sizes BS EN60898-2 & BS EN60947-2

Certificate Number: 037-0112-23
Product (Type): Outdoor Air/Water
Product Reference: QAHV-N560YA-HPB

NX2-N-G06 R454B Air Source Heat Pump

(365 to 580kW)

Standard Version (/K)

Mitsubishi Electric's **NX2-N-G06** is our flexible air source heat pump, using rotary scroll compressors, axial-flow fans, shell and tubes exchanger and an electronic expansion valve as standard.

Key Features & Benefits

- Exceptional seasonal efficiency in a compact footprint
- High efficiency scroll compressors in a multi-circuit configuration
- EC fans available as an option for improved efficiency
- Low GWP refrigerant R454B

R454B

i-FX-N-G05 R513A Air Source Heat Pump

(453 to 1,112kW)

High Efficiency Version (/A)

Mitsubishi Electric's **i-FX-N-G05** is our high performance reversible air source heat pump, complete with Variable Speed Drive (VSD) screw compressors and EC fans as standard.

Key Features & Benefits

- Very high seasonal efficiency in a compact footprint, offering full inverter technology
- High efficiency inverter screw compressors providing a dual refrigeration circuit resulting in lower running costs and resilient operation
- EC Fans supplied as standard
- Available options include; inbuilt hydronic pumps (fixed speed or inverter), thermal and energy meters, Smart LAN functions and many more
- Cu/Al Auxiliary Heat Exchangers supplied as standard, other protection coatings are available
- Smart defrost to increase operation time, increase COP and minimise impact on leaving water temperature

NX2-W-G06-H R454B Water-to-Water Heat Pump

(53 to 276kW)

Designed to accommodate a variety of applications, Climaveneta's **NX2-W-G06-H** is a compact and flexible water-to-water heat pump, which is reversible on the hydraulic side.

Key Features & Benefits

- Exceptional SEER and SCOP performance
- Rotary Scroll compressors with IDV technology
- Up to 60°C supply water temperature
- Advanced decentralised control options (MultiManager)
- Low GWP R454B refrigerant
- Inbuilt safety equipment for an A2L refrigerant
- Compatible with Variable Primary Flow (VPF)
- Compact design

R454B

Notes:

1. User side exchanger hot water temperature (in/out) 40°C/45°C; Source side exchanger water temperature (in/out) 10°C / 7°C (or maximum calculated temperature coming from the maximum flow rate allowed).
2. Values in compliance with EN14511.
3. Seasonal space heating energy efficiency class Low Temperature [Regulation (EU) N. 813/2013]. Average Weather Conditions. Type of calculation with variable flow and variable temperature.
4. Seasonal space heating energy efficiency class Medium Temperature [Regulation (EU) N. 813/2013]. Average Weather Conditions. Type of calculation with variable flow and variable temperature.
5. Plant (side) cooling exchanger water (in/out) 12°C/7°C; Source (side) heat exchanger water (in/out) 30°C/35°C.
6. Parameter calculated according to [Regulation (EU) N. 2016/2281].
7. Data valid for standard units without any additional options and only indicative. Safety values to be considered when cabling the unit for power supply and line-protection. Refer to Databook.
8. Theoretical - refer to serial plate for actual charge volumes.
9. Rate in accordance with AHRI standard 550/590.
10. Average sound pressure level at 1m distance, unit in a free field on a reflective surface; non-binding value calculated from the sound power level.
11. Sound power on the basis of measurement taken in compliance with ISO 9614.
12. Unit in standard configuration, without optional accessories.

Eurovent Certified Data

EW-HT-G05 R513A High Temperature Water-to-Water Heat Pump

(105 to 129kW)

CLIMAVENETA

The Climaveneta **EW-HT-G05** is perfect for applications requiring high temperature water of up to 78°C, a key feature for your decarbonisation project by complementing your air source heat pumps to create a cascade system, replacing fossil fuel heating systems.

Key Features & Benefits

- High temperature water (78°C) for replacing fossil fuel heating systems
- Low GWP Refrigerant R513A (GWP_{100} = 631)*
- Compact footprint of only 1m^2
- High temperature supply water of up to 78°C
- Advanced controls with W3000+ microprocessor
- Reliable and efficient with 2 independent refrigerant circuits
- Compatible with Master-Client controls, Keyboard In Pocket (KIP) interface and Building Energy Management System (BEMS) via interface cards
- Factory fitted options such as refrigerant leak detection, touch screen display, energy meter and additional soundproofing available

Notes:

1. Plant (side) heat exchanger water (in/out) 70°C/78°C; Source (side) heat exchanger water (in/out) 45°C/40°C.
2. Values in compliance with EN14511.
3. Seasonal space heating energy efficiency class MEDIUM TEMPERATURE in AVERAGE climate conditions. [REGULATION (EU) N. 813/2013].
4. Average sound pressure level at 1m dista nce, unit in a free field on a reflective surface; non-binding value calculated from the sound power level.
5. Sound power on the basis of measurements made in compliance with ISO 9614.
6. Sound power level in heating, indoors.
7. Unit in standard configuration/execution, without optional accessories.
8. Seasonal space heating energy efficiency.
9. Fixed flow rate and variable temperature calculation.

TX2-W-G04 /H R1234ze Water-to-Water Heat Pump

(298 to 2,510kW)

The Climaveneta **TX2-W-G04 /H** is a high performance water source reversible (on the hydraulic side) heat pump optimised for comfort heating and cooling. It uses state of the art oil free centrifugal compressors and low GWP refrigerant R1234ze, ensuring high efficiency and silent operation.

Key Features & Benefits

- Exceptional efficiency in a compact footprint
- Silent operation achieved using state of the art oil free centrifugal compressors optimised for R1234ze
- High quality shell and tube heat exchangers
- Low GWP refrigerant (GWP_{100} = 1)*
- Large variety of sizes to suit a wide variety of applications
- Flexible composition with water connections to the evaporator and condenser that can be deplyed on the right or left, to fit any application

*IPCC AR5

Our INTEGRA Simultaneous Heating & Cooling Range - An Overview

INTEGRA polyvalent heat pumps units, commonly known as 4-pipe systems, offer an innovative and efficient solution for customers requiring both heating and cooling at the same time.

Their ability to recover heat from the cooling circuit gives them exceptional versatility, combined with high energy efficiency and makes them an ideal choice for a wide range of buildings, such as large offices, hotels and hospitals alongside other premises with variable temperature control needs. The systems can be customised to adapt to the specific demands of each environment.

TER Value

In all cases where INTEGRA simultaneously produces hot and cold water, the real efficiency of the unit must be considered as the sum of heating and cooling. Measuring efficiency through traditional EER and COP indices is therefore limiting.

To objectively measure the performance in contemporary loads conditions, we calculate TER - Total Efficiency Ratio. TER is calculated as the ratio of the sum of the heating and cooling power and electrical power input. TER reaches its maximum value when the loads are completely balanced and is the most effective way to represent the real efficiency of the unit.

INTEGRA

CLIMAVENETA

Our INTEGRA range at a glance

INTEGRA polyvalent heat pumps units, commonly known as 4-pipe systems, offer an innovative and efficient solution for customers requiring both heating and cooling at the same time.

Climaveneta

Commercial polyvalent heat pumps that use a range of low GWP refrigerants, alongside the latest inverter scroll and screw compressors.

i-NX-Q
R410A Air Source Polyvalent Unit
(74 to 165kW)

Mitsubishi Electric's **i-NX-Q** is our range of air source simultaneous heating and cooling (polyvalent / 4-pipe) using Variable Speed Drive (VSD) scroll compressors as standard.

Key Features & Benefits

- Best-in-class seasonal efficiency in a compact footprint
- High efficiency inverter scroll compressors providing a dual refrigeration circuit
- Wide range of options available including: inbuilt hydronic pumps, dual pressure relief valves, BEMS interface cards, EC Fans and many more
- Copper/Aluminium auxiliary heat exchanger with other protection coating options available

NX-Q-G06 R454B 2 Compressor Air Source Polyvalent Unit

(72 to 170kW)

Mitsubishi Electric's **NX-Q-G06** is our range of air source simultaneous heating and cooling (polyvalent / 4-pipe) using two high efficiency scroll compressors as standard.

Key Features & Benefits

- Low GWP refrigerant R454B provides an environmentally friendly solution
- Exceptional seasonal efficiency in a compact footprint
- High efficiency scroll compressors providing a dual refrigeration circuit
- Wide range of options available including: inbuilt hydronic pumps, dual pressure relief valves, BEMS interface cards, EC Fans and many more
- Copper/Aluminium auxiliary heat exchanger with other protection coating options available

NX-Q-G06 R454B 2 Compressor Air Source Polyvalent Unit

(73 to 135kW)

Super-Low Noise Version (/SL)

Mitsubishi Electric's **NX-Q-G06** is our range of air source simultaneous heating and cooling (polyvalent / 4-pipe) using two high efficiency scroll compressors as standard.

Key Features & Benefits

- Low GWP refrigerant R454B provides an environmentally friendly solution
- Exceptional seasonal efficiency in a compact footprint
- High efficiency scroll compressors providing a dual refrigeration circuit
- Wide range of options available including: inbuilt hydronic pumps, dual pressure relief valves, BEMS interface cards, EC Fans and many more
- Copper/Aluminium auxiliary heat exchanger with other protection coating options available

NX2-Q-G06 R454B Air Source Polyvalent Unit

(364 to 572kW)

Super-Low Noise Version (/SL)

Mitsubishi Electric's **NX2-Q-G06** is our range of air source simultaneous heating and cooling (polyvalent / 4-pipe) using high efficiency scroll compressors.

Key Features & Benefits

- Smart and independent management of the defrost cycles
- Exceptional seasonal efficiency in a compact footprint
- High efficiency scroll compressors providing a dual refrigeration circuit
- Electronic expansion valve supplied as standard
- Wide range of options available including: inbuilt hydronic pumps, dual pressure relief valves, BEMS interface cards, EC Fans and many more
- Copper/Aluminium auxiliary heat exchanger with other protection coating options available

i-FX-Q2-G05 R513A Air Source Polyvalent Unit

(463 to 1,029kW)

High Efficiency Version (/CA)

Mitsubishi Electric's **i-FX-Q2-G05** is our flagship range for air source simultaneous heating and cooling (polyvalent / 4-pipe). Thanks to its Variable Speed Drive (VSD) screw compressors and EC fans fitted as standard it brings exceptional seasonal efficiency by recovering heat from the cooling circuit to be used in the heating circuit.

Key Features & Benefits

- Best-in-class seasonal efficiency in a compact footprint
- High efficiency inverter screw compressors providing a dual refrigeration circuit
- EC fans supplied as standard
- Low GWP refrigerant R513A
- Wide range of options available including: inbuilt hydronic pumps, thermal and energy meters, Smart LAN functions and many more
- Copper/Aluminium auxiliary heat exchanger with other protection coating options available

i-FX-Q2-G05 R513A Air Source Polyvalent Unit

(438 to 898kW)

Extra-Low Noise, High Efficiency Version (/XL-CA)

Mitsubishi Electric's **i-FX-Q2-G05** is our flagship range for air source simultaneous heating and cooling (polyvalent / 4-pipe). Thanks to its Variable Speed Drive (VSD) screw compressors and EC fans fitted as standard it brings exceptional seasonal efficiency by recovering heat from the cooling circuit to be used in the heating circuit.

Key Features & Benefits

- Best-in-class seasonal efficiency in a compact footprint
- High efficiency inverter screw compressors providing a dual refrigeration circuit
- EC fans supplied as standard
- Low GWP refrigerant R513A
- Wide range of options available including: inbuilt hydronic pumps, thermal and energy meters, Smart LAN functions and many more
- Copper/Aluminium auxiliary heat exchanger with other protection coating options available

i-FX-WQ-G05 R513A Water Source Polyvalent Unit

(451 to 953kW)

Mitsubishi Electric's **i-FX-WQ-G05** is our high performance water source simultaneous heating and cooling unit (Polyvalent / 6-pipe) that is fitted with Variable Speed Drive (VSD) screw compressors as standard.

Key Features & Benefits

- Compact and considered design
- Exceptional efficiency with inverter screw compressors across twin circuits
- High quality shell and tube heat exchangers
- Dual Pressure Relief Valves (PRV) and Electronic Expansion Valves (EEV) as standard
- Low GWP refrigerant R513A
- A wide range of options including; acoustic enclosure, thermal and energy meters, smart LAN functions and many more

Our **Chiller Range - An Overview**

Consisting of a wide range of models, the Mitsubishi Electric range of chillers are a new generation of water chiller designed for comfort and process cooling applications.

Modern multi-function buildings, shopping centres, large business centres and process cooling are just some of the examples where increased comfort and precision control are required. The Mitsubishi Electric range of chillers can deliver all of this and more through their ability to be easily integrated into ever increasingly complex building systems.

In order to maximise performance, reliability and overall system efficiency, the Mitsubishi Electric range of products bring advanced technology and know-how together in customisable packages to aid design, specification, installation and on-going operation.

- Advanced modular technology
- Scalable and fully customisable
- Air source and water cooled versions
- Plate or Shell & Tube heat exchanger options

Flexible Application Options

Comfort Cooling

By using hydronic terminals, a simple application of a chiller can include cooling a space or environment to a set temperature. By using water as the medium of energy, high sensible cooling and stable room temperatures can be achieved.

- Retail stores / Shopping centres
- Airports
- Offices
- Cinemas / Theatres
- Schools / Universities
- Museums
- Hotels and Resorts
- Hospitals / Healthcare

Process Cooling

During manufacturing processes, many substances become hot and if overheated can negatively effect the productivity and efficiency of the process. By correctly applying a chiller it is possible to ensure optimum temperatures and conditions are maintained at a steady state.

- Manufacturing processes
- Automotive and Electronic processes
- Energy and Power generation
- Industrial technology
- IT Cooling

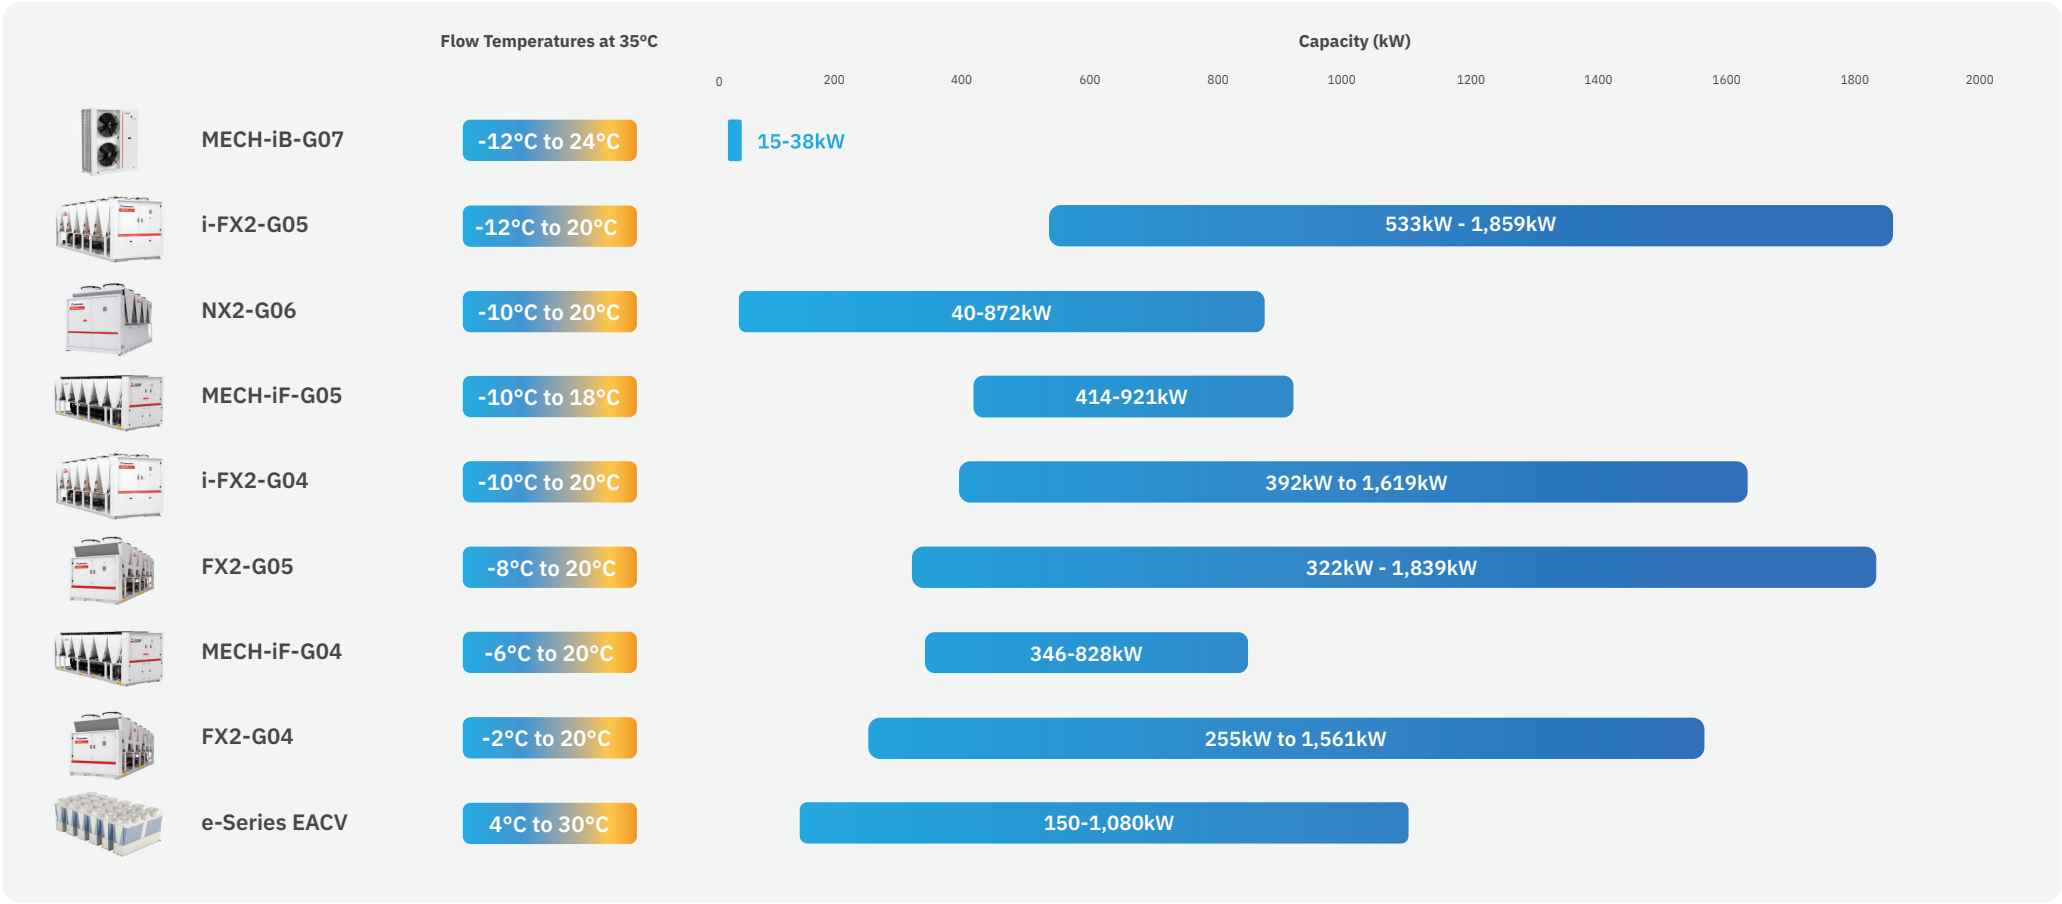
CLIMAVENETA

Our Chiller range at a glance

A wide range of advanced, customisable models for use in efficiently cooling a space or an environment to a set temperature. Our chillers fall into two broad ranges:

Mitsubishi Electric - Modular chillers manufactured to the highest quality standard, and suitable for a range of different applications, from comfort to industrial and even IT cooling processes.

Climaveneta - Chillers that use a wide range of low and lower GWP refrigerants, alongside the latest fixed speed/inverter scroll and screw compressors.



e-series

EACV
R32 Modular
Air Cooled Chiller
(150 to 1,080kW)

The R32 e-Series **EACV** range allows for up to 6 individual units to be connected together to provide a system capacity from 150kW to 1,080kW. Using this modular approach reduces space requirements and simplifies lifting and installation.

Key Features & Benefits

- Highly efficient inverter scroll compressors
- Modular to maximise space saving
- Y-shaped heat exchangers allow for a greater surface area, maximising efficiency, whilst also keeping the units much narrower than conventional chillers

Notes:

1. Under normal cooling conditions at outdoor temp 35°CDB/24°CWB (95°FDB/75.2°FWB) outlet water temp 7°C (44.6°F) inlet water temp 12°C (53.6°F). Pump input is not included in cooling capacity and power input.
2. Under normal cooling conditions at outdoor temp 35°CDB/24°CWB (95°FDB/75.2°FWB) outlet water temp 7°C (44.6°F) inlet water temp 12°C (53.6°F). Pump input is included in cooling capacity and power input based on EN14511.
3. The unit is delivered fully charged with refrigerant. No additional refrigerant is required.
4. IPLV is calculated in accordance with AHRI 550-590.
5. This value is not certified by Eurovent.

*Please don't use the steel material for the water piping.
*Please always make water circulate, or pull the circulation water out completely when not in use.
*Please do not use groundwater or well water in direct.
*The water circuit must be closed circuit.
*Due to continuous improvement, the above specifications may be subject to change without notice.
*This model doesn't equip with a pump.

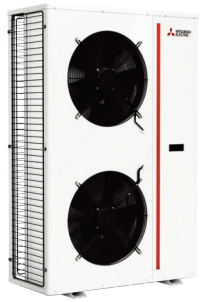
MECH-iB-G07 R32 Air Cooled Chiller

(15 to 38kW)



Mitsubishi Electric's **MECH-iB-G07** chiller provides a compact and convenient solution to your small-scale cooling needs. Designed to meet the highest of quality standards, the range uses variable speed scroll compressors optimised for using the lower GWP refrigerant R32.

Key Features & Benefits

- Extended cooling envelope
- Compact design
- Providing fluid leaving temperatures as low as -12°C
- Operates down to -20°C ambient temperatures
- Low GWP R32 Refrigerant
- High seasonal efficiency (EER, SEER, SEPR)
- Plug & Play with Integrated hydronic pump, flow switch and expansion vessel

Notes:

1. Plant (side) cooling exchanger water (in/out) 12°C/7°C; Source (side) heat exchanger air (in) 35°C
2. Values in compliance with EN14511
3. Parameter calculated according to [Regulation (EU) N. 2016/2281]
4. Values calculated referring to the version with the maximum number of fans working at the max absorbed current. Safety values to be considered when cabling the unit for power supply and line-protection. Data valid for standard units without any additional options and only indicative. Refer to databook.
5. Theoretical - refer to serial plate for actual charge volumes
6. Rate in accordance with AHRI standard 550/590
7. Average sound pressure level at 1m distance, unit in a free field on a reflective surface; non-binding value calculated from the sound power level.
8. Sound power on the basis of measurement taken in compliance with ISO 9614.
9. Sound power level in cooling, outdoors.
10. Unit in standard configuration, without optional accessories.

MECH-iF-G05 R513A High Performance Air Cooled Chiller

(414 to 921kW)

Mitsubishi Electric's **MECH-iF-G05** high performance chiller brings a new class of efficiency with its proprietary Variable Speed Drive (VSD) screw compressor cooling. Available with three configurations for noise performance (Standard, NR Kit and SL version), it features a wide operating envelope and a patented Reduced Exergy Depletion (RED) Cooler, further driving efficiencies and energy saving.

Key Features & Benefits

- Best in class efficiency
- Mitsubishi Electric's proprietary single screw compressor
- 3 noise configurations available
- CU/AL coil treatments available
- Wide operating envelope down to -20°C ambient*

*Additional low temperature options may be required.

R513A

NX2-G06 R454B 2 Compressor Air Cooled Chiller

(40 to 208kW)

Mitsubishi Electric's **NX2-G06** is our outdoor Air Cooled Chiller providing chilled water with hermetic rotary scroll compressors, ozone-friendly refrigerant R454B, axial-flow fans, plate heat exchanger and electronic expansion valve.

Key Features & Benefits

- Best-in-class seasonal efficiency in a compact footprint
- High quality brazed plate heat exchanger
- High efficiency scroll compressors
- EC Fans available as an option for improved efficiency
- Noise Reducer available for improved sound

NX2-G06 R454B 4-8 Compressor Air Cooled Chiller

(380 to 872kW)

High Efficiency Version (/A)

Mitsubishi Electric's **NX2-G06** is our outdoor Air Cooled Chiller producing chilled water with hermetic rotary scroll compressors, ozone-friendly refrigerant R454B, axial-flow fans, Shell & Tube heat exchanger and electronic expansion valve.

Key Features & Benefits

- Best-in-class seasonal efficiency in a compact footprint
- High quality Shell & Tube heat exchanger
- High efficiency scroll compressors
- EC Fans available as an option for improved efficiency
- 3 different configurations for noise and efficiency performance available

R454B

i-FX2-G05 R513A Air Cooled Chiller

(533 to 1,079kW)

Standard Version (-K)

The new generation of customisable screw compressor chillers has arrived with Climaveneta's range of **i-FX2** air cooled chillers. Available with 3 efficiency levels, all of which can be combined with 4 different levels of noise suppression, and the ability to fit integrated hydronic pumps; the **i-FX2** range has a multitude of combinations to match your project requirements.

Key Features & Benefits

- Next generation efficient design
- Wide operating envelope for comfort and process applications
- Variety of low noise versions to match your project requirements
- Exceptionally compact design
- Wide variety of customisations available including factory fitted hydronic pumps

R513A

High Efficiency Version (-E)

The new generation of customisable screw compressor chillers has arrived with Climaveneta's range of **i-FX2** air cooled chillers. Available with 3 efficiency levels, all of which can be combined with 4 different levels of noise suppression, and the ability to fit integrated hydronic pumps; the **i-FX2** range has a multitude of combinations to match your project requirements.

Key Features & Benefits

- Next generation of efficiency with exceptionally low GWP refrigerant (GWP_{100} = 1)*
- Wide operating envelope for comfort and process applications
- Variety of low noise versions to match your project requirements
- Exceptionally compact design
- Wide variety of customisations available including factory fitted hydronic pumps

FX2-G05 R513A Air Cooled Chiller

(322 to 996kW)

Standard Version (/K)

The new generation of customisable screw compressor chillers has arrived with Mitsubishi Electric's range of **FX2-G05** air cooled chillers. The second generation of this chiller family marks considerable developments in seasonal efficiency, footprint, noise, operating envelope and configuration and customisation.

Key Features & Benefits

- Compressors using low GWP refrigerant
- Wide operating envelope for comfort and process applications
- Exceptionally compact design
- Available with EC Fans including High ESP version

FX2-G05 R513A Air Cooled Chiller

(1,056 to 1,839kW)

Standard Version (/K) continued

The new generation of customisable screw compressor chillers has arrived with Mitsubishi Electric's range of **FX2-G05** air cooled chillers. The second generation of this chiller family marks considerable developments in seasonal efficiency, footprint, noise, operating envelope and configuration and customisation.

Key Features & Benefits

- Compressors using low GWP refrigerant
- Wide operating envelope for comfort and process applications
- Exceptionally compact design
- Available with EC Fans including High ESP version

R513A

Notes:

1. Plant (side) cooling exchanger water (in/out) 12°C/7°C; Source (side) heat exchanger air (in) 35°C.
2. Values in compliance with EN14511.
3. Parameter calculated according to [Regulation (EU) N. 2016/2281].
4. Data valid for standard units without any additional options and only indicative. Safety values to be considered when cabling the unit for power supply and line-protection. Refer to databook.
5. Theoretical - refer to serial plate for actual charge volumes.
6. Average sound pressure level at 10m distance, unit in a free field on a reflective surface; non-binding value calculated from the sound power level.
7. Sound power on the basis of measurement taken in compliance with ISO 9614. Sound power level in cooling, outdoors.
8. Unit in standard configuration, without option accessories.

Computer Room Air Conditioning Systems

Precise Temperature and Humidity Control

More and more businesses are opting to store their data on-site in enterprise data centres, and in the past standard wall mounted split systems may have been an option to cool this type of application.

However, complex IT environments are often characterised by variable cooling loads, which require a high cooling capacity at full load in order to allow the IT equipment to operate correctly when it is most needed.

The perfect match between efficiency and reliability

The need for high sensible cooling and control of both temperature and humidity in critical IT environments has therefore never been higher, and this is where our new range of specialist IT cooling systems makes it possible to keep temperature and humidity constant, even with very wide load variations, ensuring the correct room conditions all year round.

With our IT cooling systems, both efficiency and reliability are paramount throughout all the stages of research, design and manufacturing. By using this approach, along with over 50 years of manufacturing experience within the IT cooling sector, we are able to offer tailor made IT cooling solutions that have been designed to fulfil this requirement, reducing operational costs in the process through the use of highly efficient technology.

Mitsubishi Electric Perimeter Cooling Units

Mitsubishi Electric's systems are specifically designed for rooms with a high sensible cooling load that require precise temperature and humidity control. Because of the need for 24 hours a day, 365 days a year operation, high quality components are used and designed to maximise the energy efficiency of the system. Features include:

- Direct Expansion or chilled water versions
- Precise temperature and humidity control
- High Sensible cooling
- Easily integrates into existing and new control networks
- Back-up and rotate functions
- Inverter driven capacity control
- New generation EC PUL (Polymeric Ultralight) high efficiency fans
- Free cooling
- Dual fluid circuits available for the highest reliability

Designing the Optimum IT Cooling System

Two factors need to be taken into account when designing the perfect system for IT cooling: density and capacity. Mitsubishi Electric's wide range of products allows you to choose the correct balance of these factors, in order to meet your individual application requirements.

Mitsubishi Electric's range of dedicated IT cooling equipment includes DX systems specifically designed for IT applications, and for those who are familiar with the benefits and installation processes of our existing Mitsubishi Electric HVAC outdoor units. This opens up new opportunities for the application of DX systems in critical IT environments.

MSY-TP

R32 High SHF Wall Mounted System

Inverter (Cooling Only)

The M Series **MSY-TP** R32 High SHF wall mounted system blends energy efficiency with a modern design. This cooling only unit has a high sensible cooling capacity, making it ideal for small computer rooms and areas that require a greater degree of sensible cooling. The MSY-TP also utilises lower GWP R32 refrigerant.

Key Features & Benefits

- Compact and stylish white design
- High sensible cooling ability
- Weekly timer provides greater control of scheduling
- Cooling down to -25ºC outdoor air temperature

MSY-TP - INDOOR UNITS		MSY-TP35VF2	MSY-TP50VF2

Notes: The SHF figures are based on nominal conditions. Requires an additional MAC-334IF-E interface and PAR-42MAAB wired remote controller

s-MEXT DX

R32 Computer Room Air Conditioner (CRAC)

Ideal for smaller IT Cooling environments, the **s-MEXT** system combines a high quality indoor CRAC with Mitsubishi Electric's Mr Slim Power Inverter condensing unit to create an efficient and precision Direct Expansion (DX) Split System for server rooms, UPS rooms and Mechanical and Technical rooms (MERs & TERs).

R32

Key Features & Benefits

- High efficiency achieved through Mr Slim Power Inverter technology
- EC plug fans fitted as standard
- Pipe runs up to 100m
- Full function - Humidifier & Heater options
- Available in Upflow [over] and Downflow [under] variants

Notes:
The cooling capacity does not consider the supply fan motor thermal load.
1. Gross value based on return air of 27°C - 47%RH; Ambient Temperature 35°C; ESP=20PA; Interconnecting pipework length 5m.
2. SHR = Sensible Cooling Capacity / Total Cooling Capacity.
3. EER = Energy Efficiency Ratio.
4. Rubber pipe - referred to internal diameter.
5. Minimum section.
6. External Static Pressure.
7. Corresponding to the nominal ESP=20Pa.
8. As per ISO 3744. Sound pressure level on air return at 1m.
9. All data refers to a single outdoor unit / circuit.
10. In one direction.
11. Additional refrigerant required for pipework separation greater than the standard.
12. Average sound pressure level, at 1m distance, unit in a free field on a reflective surface according to ISO3744. Non-binding value obtained from the sound power level.

x-MEXT DX

R410A Computer Room Air Conditioner (CRAC)

The **x-MEXT DX** is a highly efficient computer room air conditioner (CRAC), incorporating a wide range of options and configurations, and manufactured to the highest Mitsubishi Electric quality and reliability standards. The x-MEXT includes BLDC Mitsubishi Electric compressors, microchannel heat exchanger options, and an EC fan on the indoor unit with an impeller made of recycled plastic, that is specifically design for the x-MEXT range.

Key Features & Benefits

- Perimeter unit with upflow (over) and downflow (under) configurations
- Full inverter technology with BLDC Mitsubishi Electric compressors and a proprietary fan design
- Excellent efficiency with load matching control
- Advanced in-house developed control software
- Intelligent LAN controls for up to 15 units
- Interface cards available with many common BEMS protocols
- Automatic transfer switches and fast restart options
- Optional low ambient temperature kit for extreme conditions
- Full function humidifier and heating options
- Optional dampers, floor stands and discharge plenums

Notes:

*1 Gross Total Values shown for Downflow [under] airflow configuration. Operating Conditions: Return Air Temperature: 30°C / Relative Humidity: 35% / Ambient: 35°C / External Static Pressure: 20Pa

*2 EER for indoor unit only.

*3 As per ISO EN 16890. Other filter options are available.

*4 Average sound level, at 1m distance, unit in a free field on a reflective surface according to ISO3744. Non-binding value obtained from the sound power level.

*5 Equipment connection only; consult x-MEXT / MEGR databooks for interconnecting pipework sizing.

*6 Rubber pipe - refers to internal diameter.

*7 All data is "per condenser". Typical condenser arrangement shown, other condenser sizing combinations are available.

*8 Other type of fans are available.

*9 Based on vertical airflow direction.

These units contain <HFC R410A [GWP_{100} 2088]> fluorinated greenhouse gas.

w-MEXT

Chilled Water Computer Room Air Handler (CRAH)

The **w-MEXT** chilled water range incorporates the latest EC Plug fans, advanced controls software and maximises the coil area to bring high efficiency and high SHR performance to smaller data centre and server room environments.

Group controls and smart control strategies are not reserved for larger environments: w-MEXT can operate with intelligent integrated LAN functions for active redundancy and also integrate with the Hydronic Plant Connect (HPC) group control system, bringing harmony between the CRAHs and Chillers.

Additional options for electric heating and humidification further extend control and operational functionality.

Key Features & Benefits

- Compact footprint with Under, Over and Displacement airflows
- Adaptive set-point
- High efficiency EC plug fans
- LAN controls for up to 15 units
- Variety of valve options

w-NEXT

Chilled Water Computer Room Air Handler (CRAH)

High precision air conditioners are ideal for applications where high sensible cooling and control of temperature and humidity are required. The **w-NEXT** chilled water range incorporates the latest EC plug fan(s), advanced controls software and an increased coil area resulting in the highest efficiency.

Key Features & Benefits

- High Efficiency - EC plug fans
- Small footprint
- Adaptive Set Point
- Active Redundancy
- Available in Upflow [over] and Downflow [under] variants

THE COOLING CAPACITY DOES NOT CONSIDER THE SUPPLY FAN MOTOR THERMAL LOAD

*1 Downflow version only.

*2 Gross value based on return air at 24°C - 45%RH; Chiller water 7°C / 12°C.

*3 SHR = Sensible cooling capacity / Total cooling capacity.

*4 Fan(s) input power (ESP=20Pa).

*5 Average level at 1m from unit in free field conditions.

*6 Rubber pipe - refers to internal diameter.

w-MEXT-XL

Extra Large Computer Room Air Handler (CRAH)

Mitsubishi Electric's **w-MEXT-XL** is a purpose built, extra large CRAH, specifically designed to meet the needs of large colocation and hyperscale data centers.

With a capacity ranging from 193kW to 336kW, in four module sizes, the w-MEXT-XL is available in three performance versions with a perfectly matched heat exchanger designed for 10K, 12K and 15K Delta T conditions, giving it the best in class efficiency. Additionally the w-MEXT-XL can be used with downflow or rear-flow configurations with options for hydraulic connections (version dependent).

An array of high quality industry leading options are available to the w-MEXT-XL including; harmonic filters for EC fans to provide a guaranteed THDi < 5%, fast restart using inbuilt Ultracap with new embedded logic for ultra-quick cooling restoration, EPIV valves with advanced monitoring and Automatic Transfer Switch (ATS) to automatically switch to an alternative power supply and more.

Key Features & Benefits

- Design purposefully for meeting hyperscale and large colocation datacenters needs
- Exceptional performance with best in class efficiency
- Uniquely versatile with flexible hydraulic connections, multiple air delivery versions and a range of sizes
- Options for high quality EC fans fitted with harmonic filters for THDi < 5%
- Available with an extensive array of accessories such as Fast Restart and EPIV Valves
- Designed for effortless maintenance with frontal access to all components, easy filter changes and sliding EC fans

Data table shows rear-flow design. Downflow details and performance available on request.

MEWALL

Data Centre Fan Wall

Mitsubishi Electric's new and improved **MEWALL** brings performance and reliability at scale. It is ideal for hyperscale datacentres and large co-location customers, so that they can fully utilise their large building structures to deliver improved efficiencies and make every kW count.

By changing the airflow convention, the unit is designed for horizontal airflow at scale. This allows for taller heat exchangers, with elevated water temperatures, improving performance over conventional designs. It also allows for the separation of the white space from the technical corridor, simplifying security arrangements. Most importantly, this design eliminates the need for raised floors: simplifying building design, installation and reducing costs. Available in 2 sizes for 350kW to 400kW applications, it is available with a variety of options including an option to replace the side panels with filters to lower the airflow pressure drop and further improve on efficiency.

Key Features & Benefits

- State of the art EC fans with high efficiency air intake grilles
- High quality, low pressure drop filters easily accessible from the front
- Improved performance with side filter version
- Eliminates the need for raised floors in your white space
- Highly efficient EC fan combined with efficient heat exchanger
- Operates at modern hyperscale conditions
- Easy to service - fully accessible from the front
- Advanced control and networking options
- Available with variety of options including a variety of hydronic control valves, harmonic filters, fast restarts, touchscreen display and more

m-MRAC / m-MROW

R410A Multi Density Close Coupled Control System

Mitsubishi Electric's **Multi Density** systems combine the efficiency, quality and simplicity of VRF with high performance close coupled air conditioning units. Multi Density is ideal for applications where high sensible cooling and control of temperature in high density applications is required. This system consists of multiple indoor 'coolside' close coupled air conditioners connected to a City Multi VRF outdoor unit. The result is a full inverter multi-split system, designed according to the best quality standards and dedicated to the most reliable IT environments. The range is particularly suitable for high density racks and blade server cooling in data centres, as it is able to cope with the high density of the thermal load, putting the air conditioning unit directly within the rows of racks to cool the localised heat sources (hot spots).

Key Features & Benefits

- High Efficiency - full Mitsubishi Electric inverter technology
- Small footprint
- Pipe runs up to 165m
- Trusted VRF technology

Notes:
THE COOLING CAPACITY DOES NOT CONSIDER THE SUPPLY FAN MOTOR THERMAL LOAD.
*1 All data refers to the Rating Configuration with 2x m-MROW-Z G02 F/S 025 @35°C Outdoor Temperature and 35°C/27%rh Indoor Temperature.
*2 SHR = Sensible cooling capacity / Total cooling capacity.
*3 Corresponding to the nominal ESP=20Pa.
*4 Sound pressure level on air return at 1m.
*5 Rubber pipe - refers to internal diameter.
*6 Minimum section. It's possible to connect indoor units with a sum of sizing from 25 to 75.
*7 When outdoor unit is below indoor unit.
These units contain <HFC R410A [GWP_{100} 2088]> fluorinated greenhouse gas.

NR2-FC-G06-Z

R454B Free-Cooling Chiller

(359 to 895kW)

The **NR2-FC-G06-Z** is our outdoor chiller with integrated free-cooling utilising hermetic rotary Scroll compressors with R454B refrigerant, axial-flow fans, shell and tubes exchanger and an electronic expansion valve.

The range is composed of units equipped with four, five and six compressors in multi-circuit configuration. Available in 14 sizes from 359kW to 895kW cooling capacity and operating on R454B low GWP refrigerant, makes the NR2-FC-G06-Z best in class. The NR2-FC-G06-Z is available as four different configurations for noise and efficiency performance (K, SL-K, A, SL-A), with a wide operating range from 5°C to +24°C evaporator leaving water temperatures (ELWT) and ambient temperatures from 48°C to -30°C. The NR2-FC-G06-Z can also be fitted with a range of options including Soft Start, energy meters, BEMS interface cards and on-board hydronic kits.

Key Features & Benefits

- Best-in-class seasonal efficiency in a compact footprint
- Available in 'No Glycol' versions
- High efficiency scroll compressors providing a multi refrigeration circuit
- EC Fans available as an option for improved efficiency (standard on A version)
- Four different configurations for noise and efficiency performance available (K, SL-K, A, SL-A)
- Lower GWP refrigerant R454B
- Available options include; inbuilt hydronic pumps, energy meters, Refrigerant leak detection, dual power supply and many more
- Microchannel MCHX for condenser coil and Cu/Al for free cooling coil
- Fast Restart fitted as standard

General - Other models are available to suit noise or efficiency (K, SL-K, SL-A) including No Glycol (NG) hydraulic version. Models shown here are high efficiency "A" versions

TR2-FC-G04-Z

R1234ze Free-Cooling Chiller

(1,216 to 1,819kW)

The **TR2-FC-G04-Z** is a high efficiency free-cooling chiller designed for hyperscale and colocation data centres. Available in both standard and No Glycol (-NG) versions, it features oil-free centrifugal compressors optimised for low GWP R1234ze refrigerant, operating in 3 modes: total free-cooling, hybrid free-cooling and mechanical cooling. The innovative new free-cooling control logic enhances the system's EER throughout the year, providing up to 20% annual energy savings compared to previous control logics.

Key Features & Benefits

- Best-in-class Energy Efficiency Ratio (EER)
- Low GWP R1234ze refrigerant (IPCC AR5)
- Highly efficient components throughout: magnetic levitation centrifugal compressors, large diameter EC fans and advanced control and optimisation algorithms
- Designed for chilled water with higher temperatures up to 26°C and high ΔT of up to 20K, ideal for the modern hyperscale data centre
- V-block design improves maintenance and increases the cooling density with the patented Reduced Exergy Depletion (R.E.D) Cooler
- Wide set of new options: fan diffusers, discharge air plenum, fast restart with ultracap, and energy monitoring amongst many others

Refrigeration

Energy Efficient Refrigeration Units

Contents

Energy Efficient Refrigeration Units

Refrigeration is a necessary part of our modern way of life and is essential to the way we store and display food for convenience purchase.

At the same time, given today's concerns about global warming and environmental protection, energy conservation policies are becoming increasingly stringent. It is becoming progressively more important for cold chain retailers to shift towards greener natural refrigerants and energy efficient equipment.

With our technical expertise, long experience and innovative product range, we are able to offer customers the ability to reduce their carbon emissions and assist them in achieving the UK governments Net Zero targets.

Introducing the **ECOV Natural Refrigerant Condensing Units**

The Mitsubishi Electric ECOV Series is ideally suited for convenience stores, cold storage rooms and cold chain distribution centres, and delivers reliability and energy efficiency through its use of proven Mitsubishi Electric technology.

Utilising non-flammable CO_2 refrigerant with a low global-warming potential of 1, means that CO_2 emissions are significantly reduced when compared to conventional systems that use HFC refrigerants.

ECOV Series - Key Technologies

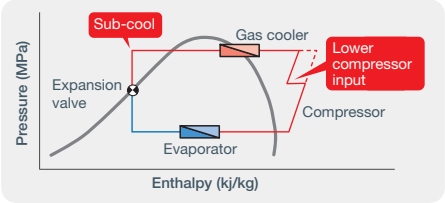
A. Compressor

Inverter-driven

With the use of an inverter driven single stage scroll compressor for the ECOV-X37/55VA and an inverter driven 2 stage rotary compressor for the ECOV-X15VA, the energy efficiency of the system is higher than that of a fixed speed non-inverter system.

Optimised refrigerant circuit

The ECOV Series adopts an optimal compressor for each capacity. The ECOV-X15VA uses a two-stage compressor, while the ECOV-X37/55VA utilises a single-stage compressor with a middle pressure injection circuit.



These mechanisms enable the gas cooler to achieve greater sub-cooling with maximum efficiency.

B. Heat Exchanger (Rear side)

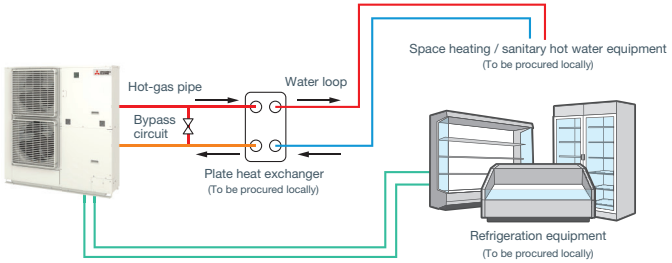
Flat aluminum tube

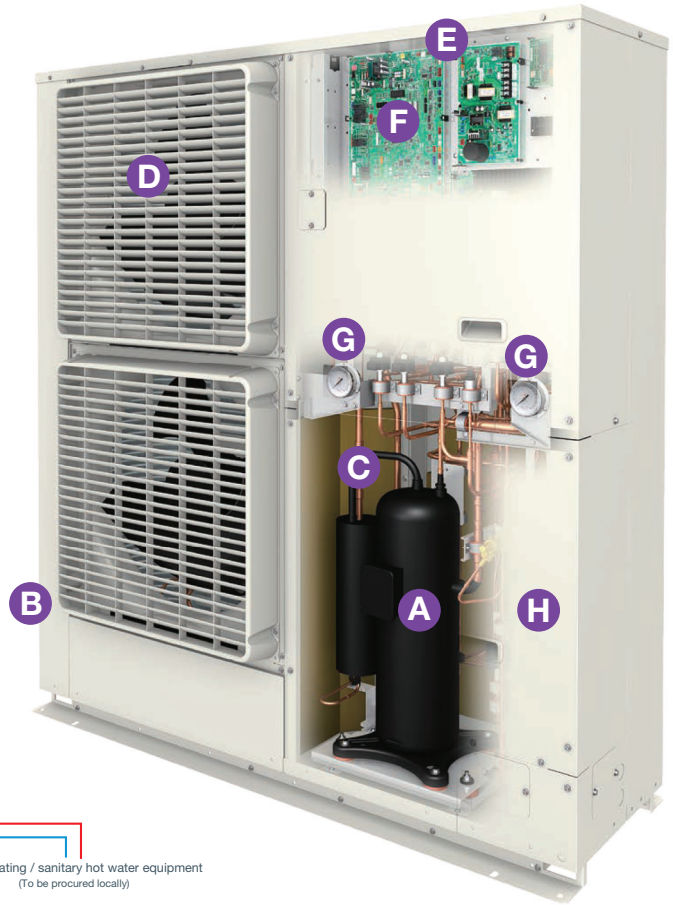
The use of a MFC* aluminum flat tube heat exchanger and corrugated fins increases the contact area with air and refrigerant, resulting in greater heat-exchanging efficiency. Anti-corrosion coating against salt damage is applied to the heat exchanger as a standard feature.

*MFC: Multi Flow Condenser

C. Heat Recovery Port

Heat recovered from the refrigeration equipment can be utilised to provide space heating and/or sanitary hot water elsewhere in the building.





D. Fan

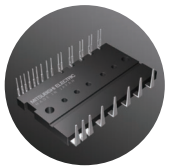
DC Inverter fan

DC-driven inverter fan(s) are equipped in each unit for precise control, to optimise system efficiency and minimise noise levels.

E. Control Board

IGBT Module

Power modules manufactured by Mitsubishi Electric are used on the ECOVs inverter board.



This greatly reduces the power loss of the voltage boosting circuit and improves the units efficiency levels.

Easy Servicing

F. LED Display

During operation, a digital LED display shows the refrigerant's low pressure value, operation mode, and compressor frequency. In case of malfunction, an error code is displayed enabling quick diagnosis.

G. Pressure Gauges

Gauges displaying the low and high pressure values.

H. Liquid Receiver / Accumulator

A large liquid receiver and accumulator inside the unit provides the ability to easily control the refrigerant charge and ensure durability against liquid return, which leads to easy on-site service and stable operation.

ECOV Series R744 Natural Refrigerant Condensing Unit

The **ECOV Series** refrigeration condensing units are inverter-driven and deliver reliability and energy efficient heat recovery through their use of proven Mitsubishi Electric technology.

Utilising the natural and stable refrigerant CO_2 (R744) with a GWP of 1, the environmentally clean solution enables compliance with local planning laws and F Gas Regulations. Designed with a compact footprint, these units can be easily installed in smaller plant areas and are capable of delivering chilling or freezing. With refrigeration duties ranging from 1.29kW to 16.7kW at an ambient temperature of 35ºC, the ECOV Series is an ideal choice for small retail shops, convenience stores and cold storage rooms, including distribution centres.

Key Features & Benefits

- Utilises natural CO_2 refrigerant to help meet key CSR targets
- Wide evaporating temperature range between -45ºC and -5ºC, meaning units can be used for chilling or freezing
- Modbus compatibility allows the units to easily communicate with various monitoring systems
- Heat recovery port enables rejected heat to be used for sanitary hot water demand in other areas of the building
- DC driven fans ensure the units deliver a low noise level, allowing installation in noise sensitive urban environments
- Anti-corrosion coating applied as standard to the heat exchanger, protecting against salt damage in harsher coastal environments
- Equipped with an inverter driven compressor, multi-flow gas cooler and DC inverter fan to improve energy saving performance
- Small footprint and horizontal air flow structure, facilitating installation in small spaces and urban environments
- The ECOV-X15VA features a pre-alarm function which enables an alarm to be activated when a risk of fault is detected, preventing malfunction and downtime of unit
- The ECOV-X15VA features three additional operation modes for easy maintenance and further energy savings

Notes:

*1 Measurement conditions: Ambient temperature: 32°C, Evaporation temperature: -10°C, Compressor operating frequency: 70Hz for ECOV-X15VA / 61Hz for ECOV-X37VA / 95Hz for ECOV-X55VA, Fan control: Target condensation temperature = Ambient temperature: 5°C.
*2 Measurement conditions: Ambient temperature: 32°C, Evaporation temperature: -30°C, Compressor operating frequency: 70Hz for ECOV-X15VA / 61Hz for ECOV-X37VA / 95Hz for ECOV-X55VA, Fan control: Target condensation temperature = Ambient temperature: 5°C.
*3 If the liquid pipe length exceeds 30m, set the pipe diameter to 12.7mm (1/2").
*4 Measurement conditions of sound pressure levels: Ambient temperature: 32°C, Evaporation temperature: -10°C, Measurement location: 1m or 10m from front of unit (refer to spec table row) / height 1m, Compressor operating frequency: 70Hz for ECOV-X15VA / 66Hz for ECOV-X37VA / 95Hz for ECOV-X55VA, Fan control: Target condensation temperature = Ambient temperature 5°C. Measurement conditions of sound pressure levels in brackets are altered as follows: Compressor operating frequency: 61Hz for ECOV-X37VA / 95Hz for ECOV-X55VA, Fan control: Target condensation temperature = Ambient temperature 10°C.
*5 A pressure relief device, a sight glass and a dryer must be installed on the liquid pipe. Please procure these parts locally.
*6 MODBUS® is a registered trademark of SCHNEIDER ELECTRIC USA, INC. in the United States.
*7 Power condenser cannot be installed.
*8 Use the included reducer to connect the liquid piping.

ecodan Renewable Heating Technology

Ecodan Heat Pumps - Renewable Heating Systems

There is now no doubt that the world is in a climate crisis and that we need to act immediately to avoid catastrophic climate change. The UK Government have reacted by being the first major economy to pass net zero (Greenhouse Gas) emission laws. Renewable technologies, such as heat pumps, have become an integral part of the solution to the problem of reducing carbon emissions generated through heating.

As a market leader in both commercial and domestic heat pumps, Mitsubishi Electric is a pioneer in the development of this renewable technology. Around the world, heat pumps have been utilised for decades and Mitsubishi Electric has refined this technology to produce Ecodan - one of the most advanced, efficient heating systems available on the market today.

The award winning Ecodan heat pumps are available from 5kW up to 640kW, making them suitable for virtually any property, from small flats to large detached houses, from an office block to a school. They are the renewable, low carbon alternative to traditional high carbon heating systems.

- **Renewable heating solution capable of reducing emissions and achieving climate targets**
- **Highly efficient, proven and refined technology that can lower energy bills**
- **Range of easy to design, install and maintain systems suitable for a variety of property and application types**

Ecodan heat pumps are a renewable heating technology that efficiently and reliably generates sustainable space heating and hot water all year round, delivering a level of comfort that sets the technology apart from other forms of heating.

TV presenter, architect, lecturer and writer, George Clarke is a passionate advocate of design excellence and high levels of quality in the construction industry.

“ The way we design, build, heat, power and recycle our homes needs to change, and change quickly, and renewable heating is an important part of our future.

I’m therefore delighted to associate myself with Ecodan, the market-leading brand of heat pumps built here in the UK and which can help reduce energy bills and lower emissions for almost any home. ”

George Clarke

Ecodan Brand Ambassador

PUZ-WZ50-120VAA/YAA

R290 Monobloc Air Source Heat Pumps

The new R290 Ecodan monobloc air source heat pumps are designed specifically to suit the demands of the UK market and include 5, 6, 8.5, 10 and 12kW sizes.

The innovative, stylish and compact single fan outdoor unit utilises advanced technologies to deliver improved efficiencies. Designed for a wide range of applications, the market leading low noise levels virtually eliminate the need for planning permission, maximises installation options and is a viable solution for all types of domestic requirements that the UK housing market demands.

Key Features & Benefits

- A+++ heating efficiency
- Ultra quiet noise levels
- MELCloud Home enabled
- High water temperature of up to 75°C
- Fully electric source of heating and hot water
- Minimised energy consumption
- Flexible product placement
- Remote control, monitoring, maintenance and technical support
- Ideal for energy storage
- Zero carbon ready

*7 QUIET MARK

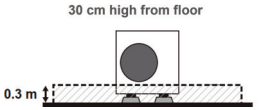
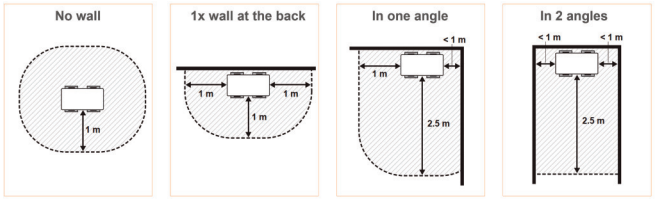
There must not be any building openings or entrance to the basement in this area.

Must not extend to adjacent buildings or public traffic areas.

Ignition sources must not be present, either permanently or for a short period of time.





ecodan

PUZ-WM50VHA

R32 Monobloc Air Source Heat Pump

Our range of Ecodan monobloc air source heat pumps includes a 5kW size.

With enhanced performance and efficiencies of the new chassis, combined with the ability to cascade up to six units of the same output, this Ecodan monobloc system can provide a capacity range from 5 through to 30kW. Designed to suit a wide number of applications, this model offers a viable solution for all types of domestic requirements that the UK housing market demands.

Key Features & Benefits

- Self-contained unit, only requiring water and electric connections
- No need for gas supply, flues or ventilation
- Low maintenance and quiet operation
- Operates with outside temperatures as low as -20ºC
- Optimised low ambient defrost control and operation down to -7°C
- Hybrid function, for use with conventional boilers
- Energy monitoring as standard
- Multiple unit cascade function

PUZ-HWM140VHA/YHA

R32 Monobloc Air Source Heat Pumps

Our range of Zubadan chassis Ecodan monobloc air source heat pumps are suitable for properties with large space heating requirements and are available in single or three phase 14kW sizes.

With its advanced flash injection technology, this product provides a solution to low ambient capacity issues common to standard systems and is a viable solution for all types of domestic requirements that the UK housing market demands.

Key Features & Benefits

- Self-contained unit, only requiring water and electric connections
- No need for gas supply, flues or ventilation
- Low maintenance and quiet operation
- Operates with outside temperatures as low as -28ºC
- Optimised low ambient defrost control and operation down to -15°C
- Hybrid function, for use with conventional boilers
- Energy monitoring as standard
- Multiple unit cascade function

EHPT20X-MEHEW

FTC7 Packaged Cylinder for Ecodan Monobloc Units

The Packaged Cylinder provides a highly adaptable heating solution for all property types.

Designed to optimise performance within a compact white goods footprint, the plug and play packaged cylinder fully integrates with the Ecodan monobloc air source heat pump range. Advanced plate heat exchanger technology delivers superior heat up times and our rapid SD card commissioning, MELCloud Home Wi-Fi connectivity and energy monitoring functions are also included as standard.

Key Features & Benefits

- A+ hot water efficiency
- Stylish and modern aesthetics
- Packaged hot water, heating and controls
- Colour touch screen control
- MELCloud Home enabled
- Minimised energy consumption
- Flexible product placement
- Plug and play simple installation
- Intutive user friendly operation
- Remote control, monitoring, maintenance and technical support

FTC7 Controller

Mitsubishi Electric's seventh generation controller (FTC7) includes intelligent room temperature control as standard. This together with advanced weather compensation ensures the system delivers efficient, comfortable heating regardless of the season. FTC7 also includes energy monitoring showing consumed and produced energy.

EHPT15-17X-UKHLEWS

FTC7 Pre-Plumbed Slimline Cylinders for Ecodan Monobloc Units

The Pre-Plumbed Slimline Cylinder comes complete with integrated hydraulic components & advanced controls.

Designed to optimise performance and flexibility within a minimal footprint, the slimline cylinder fully integrates with the Ecodan monobloc air source heat pump range. Advanced plate heat exchanger technology delivers superior heat up times and our rapid SD card commissioning, MELCloud Home Wi-Fi connectivity and energy monitoring functions are also included as standard.

Key Features & Benefits

- Pre-Plumbed and Pre-Wired
- DHW Plate Heat Exchanger combined with scale trap
- Low Loss Header
- Colour touch screen control
- MELCloud Home enabled
- Plug and play simple installation
- Excellent hot water recovery times
- Automatic heat pump flow rate regulation
- Intuitive user friendly operation
- Remote control, monitoring, maintenance and technical support

FTC7 Controller

Mitsubishi Electric's seventh generation controller (FTC7) includes intelligent room temperature control as standard. This together with advanced weather compensation ensures the system delivers efficient, comfortable heating regardless of the season. FTC7 also includes energy monitoring showing consumed and produced energy.

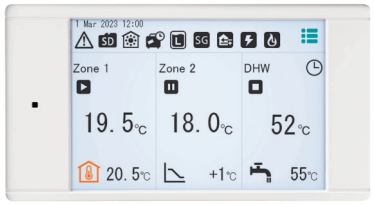
FTC7 / FTC2BR Flow Temperature Controllers

For use with Ecodan Monobloc Units and Third Party BEMS



The FTC7 Flow Temperature Controller is designed specifically by Mitsubishi Electric to integrate with the Ecodan PUZ monobloc air source heat pump range and a third party cylinder.

The FTC2BR has been developed to allow the Ecodan PUZ-(H)WM range to interface with third party or BEMS (Building Energy Management System) controls. A combination of volt free and voltage inputs allow the Ecodan PUZ-(H)WM monobloc range to be used in applications where only simple on/off and temperature control is required.

Functions that can be controlled and monitored by third party controls:

Controlled

- On/Off heating mode
- On/Off heating ECO mode
- On/Off hot water mode
- On/Off holiday mode
- On/Off legionella mode
- Change water flow temperature

Monitored

- Unit running
- Error
- Defrost

The ability to interface with third party controls opens up a huge number of application opportunities. Many processes simply require a heat source that provides hot water, without polished end user controls. The FTC2BR controller allows the Ecodan PUZ to be used in these applications. FTC2BR inputs and outputs can be used in conjunction with local BEMS.

Energy Monitoring Packs

All Ecodan Flow Temperature Control systems come with free energy monitoring as standard. System users are able to measure both consumed electrical energy and produced heat energy to the nearest kWh.

In addition to the basic system functionality features, i.e. hot water and heating status, the system's energy performance can also now be viewed. Historic energy consumption, heat production and run cost reports are available via the main controller, SD card or MELCloud Home.

MELCloud Home Wi-Fi Connectivity

MELCloud Home is a cloud based solution for controlling your Mitsubishi Electric Ecodan heating system either locally or remotely by PC, Mac, Tablet or Smartphone via the internet.

MELCloud Home enables effortless management of an Ecodan system anytime, anywhere, providing real-time system status updates and allowing the user to monitor energy usage and temperature reports, directly from their device.

The set up and remote operation of your Ecodan heating system via MELCloud Home is simple and straight forward. All you need is a wireless connection where the Ecodan is located and an internet connection on your mobile or fixed device. To set up the system, the router and the Ecodan Wi-Fi interface need pairing and this is done simply and quickly via the WPS button found on all mainstream routers, or using access point pairing via a mobile phone.

Key Features & Benefits

- Monitor & control your Ecodan directly from your connected device
- Access to remote maintenance and technical support
- Reports on energy use, temperature history and more
- Share / restrict access and control of the Ecodan system
- Smart home integration via Amazon Alexa

Available on the App Store | GET IT ON Google Play | Windows Store

i-LIFE2 Slim

Fan Assisted Radiator

The i-Life2 Slim Fan Assisted Radiator is designed to work seamlessly with existing heating or renewable technologies.

Key Features & Benefits

- Stylish - At only 13cm deep, the sleek and elegant satin-white, wall mounted cabinet is designed to blend seamlessly into any setting
- Flexible - Packed with advanced controls and functions, the i-Life2 Slim will work with traditional heating or renewable systems such as heat pumps
- Easy to Use - Airflow is managed by deflectors at the top of the unit, which open and close automatically, ensuring fast and even heat distribution

i-Life2 Slim units are managed by a variable speed fan motor that continuously modulates the fan speed

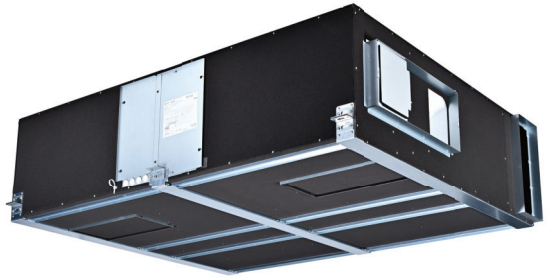
Ventilation

Fresh Air Ventilation Range

Contents

Fresh Air Ventilation Range

Why Do We Need **Fresh Air Ventilation**?



The build-up of health damaging pollutants, mould and rot are all attributed to poor indoor air quality and the lack of effective ventilation.

With highly airtight buildings on the rise, alongside increasingly strict legislation on air quality, the need is growing for an effective solution such as mechanical ventilation, which is also energy efficient. Mitsubishi Electric systems are perfectly placed to address this need and are the ideal solution to provide fresh air.

Our range includes single and multi-room Mechanical Ventilation with Heat Recovery (MVHR) units and medium to large scale ventilation solutions including Air Handling Units (AHUs). All systems have been designed to provide the best ventilation solution for the chosen application, by delivering the required amount of fresh air, whilst extracting the right amount of stale air, in the most energy efficient way possible.

Fresh air benefits include:

- A healthy and better maintained building
- Improved air quality for occupants
- Improved comfort via the recovery of heat to incoming fresh air

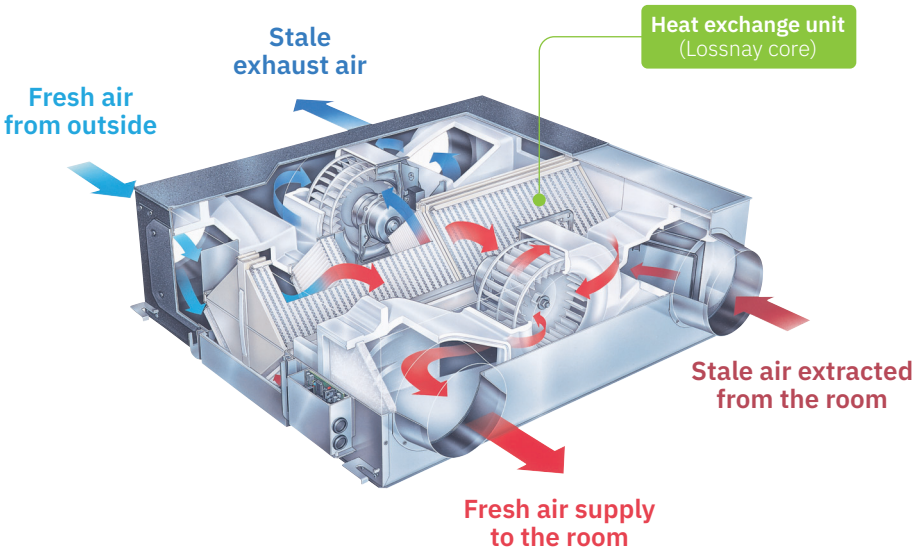
Excellent Air Quality and Heat Exchange Efficiency

How Lossnay Works

Our Lossnay systems have perfected the recovery of energy that would have otherwise been wasted. They do this by either warming or cooling incoming air, a feature which makes Mitsubishi Electric MVHR units extremely energy efficient.

Heat Recovery is made possible via the unique Lossnay ultra-thin paper core technology, which is constructed in a corrugated form and layered in alterative directions.

This design allows a cross airflow to maximise heat recovery without the supply and exhaust air mixing, ensuring only fresh air is introduced to the building.



How Air Handling Units work

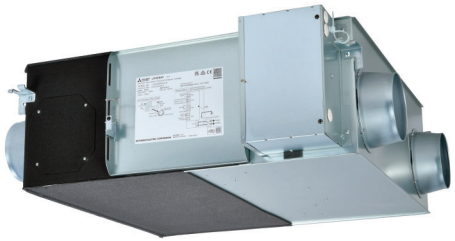
Packaged Air Handling Units (AHUs) are designed to provide a tempered fresh air supply into commercial buildings. They work in conjunction with the building's air conditioning system to provide occupants with a fresh and comfortable environment.

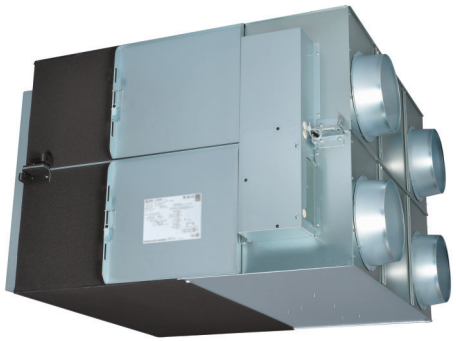
The Mitsubishi Electric AIRME Compact Air Handling Units incorporate a frameless structure to achieve a line-up of units that are as compact as possible, maximising air tightness and improving thermal properties.

The s-AIRME-G07 HR-P range of AHU's utilises a combination of Mr Slim R32 Power Inverter heat pump technology, energy efficient plate heat exchanger heat recovery technology, and an integrated control system.

LGH-RVX3-E

Commercial Lossnay





Compatible with Mitsubishi Electric plug-and-play CO_2 sensor (powered by the Lossnay unit)

The new Lossnay **LGH-RVX3-E** Mechanical Ventilation Heat Recovery (MVHR) systems are designed to supply clean, fresh air into any commercial building, whilst simultaneously extracting stale air, ensuring good indoor air quality for occupant wellbeing. These units are also able to recover valuable heat energy from inside the building, maximising energy efficiency and reducing running costs.

Key Features & Benefits

- Mitsubishi Electric pioneered heat exchanger enables maximised latent heat exchange, resulting in cost and carbon savings
- Four commissionable fan speeds, settable between 25-100%, with independent supply and return fan control offering low running costs and easier compliance to Part L
- Optional Mitsubishi Electric energy saving CO_2 sensor allows automatic incremental fan control for a healthy indoor environment
- Full airflow in bypass mode, promoting good indoor air quality during free cooling
- Dual-Barrier coating on the fan prevents dust and grease accumulation, ensuring long-term efficient operation
- Lightweight structure ideal for easy ceiling installation
- Vertical installation available for flexibility of application
- Easy control interlock with Mr Slim and City Multi air conditioning systems, including M-NET connection for centralised control

STANDARD FILTER			ISO 16890 Coarse 60%*1								

Notes: Running current, power consumption, recovery efficiency, and sound levels are based on the above default airflow rates at 25%, 50%, 75%, and 100%. Specific duty point data is available upon request. Supply and exhaust fan speeds can be individually commissioned between 25% and 100% in 5% increments. Sound Pressure Level measured at 1.5m under the centre of the bottom panel. Air flow rates, external static pressure and specific fan powers tested to BS EN13053: 2019. Energy recovery efficiencies tested to BS EN308: 2022.

*1: EN 779 G4 equivalent according to 'REHVA Filter Class Conversion between EN 779 and EN ISO 16890-1'.

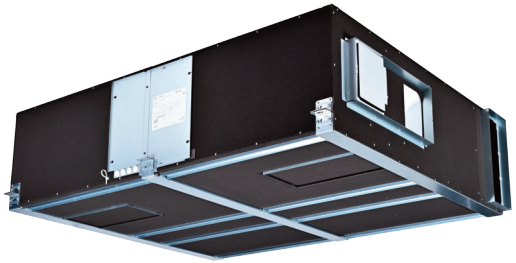
Commercial Lossnay

Lossnay **LGH-RVXT3-E** Mechanical Ventilation Heat Recovery (MVHR) systems are designed to supply clean, fresh air into any commercial building, whilst simultaneously extracting stale air, ensuring good indoor air quality for occupant wellbeing. Offering a significantly reduced height, whilst maintaining a large airflow, these units are designed for installation in ceiling voids within commercial properties.

Key Features & Benefits

- Mitsubishi Electric pioneered heat exchanger enables maximised latent heat exchange, resulting in cost and carbon savings
- Low unit height (500mm) and lightweight structure, ideal for ceiling installation
- Four commissionable fan speeds, settable between 25-100%, with independent supply and return fan control offering low running costs and easier compliance to Part L
- Optional Mitsubishi Electric energy saving CO_2 sensors allow automatic incremental fan control for a healthy indoor environment; sensors powered by Lossnay unit
- Easy control interlock with Mr Slim and City Multi air conditioning systems, including M-NET connection for centralised control
- Dual-Barrier coating on the fan prevents dust and grease accumulation, ensuring long-term efficient operation



Compatible with Mitsubishi Electric plug-and-play CO_2 sensor (powered by the Lossnay unit)

WEIGHT		kg	172	172	172
DIMENSIONS	Width x Depth x Height	mm	2100 x 1600 x 500		
ELECTRICAL POWER SUPPLY			3-phase, 380-415v, 50Hz*2		
MAXIMUM CURRENT		A	3.0	3.9	5.0
HEAT EXCHANGER			Paper with Specially Treated Cellulose Membrane		
STANDARD FILTER			ISO 16890 Coarse 60%*1		

Notes: Running current, power consumption, recovery efficiency, and sound levels are based on the above default airflow rates at 25%, 50%, 75%, and 100%. Specific duty point data is available upon request. Supply and exhaust fan speeds can be individually commissioned between 25% and 100% in 5% increments. Sound Pressure Level measured at 1.5m under the centre of the bottom panel. Air flow rates, external static pressure and specific fan powers tested to BS EN13053: 2019. Energy recovery efficiencies tested to BS EN308: 2022.

*1: EN 779 G4 equivalent according to 'REHVA Filter Class Conversion between EN 779 and EN ISO 16890-1'.

*2: 3 phase 4 wire power must be connected. The unit only uses loads L2 and L3, meaning L1 does not draw load.

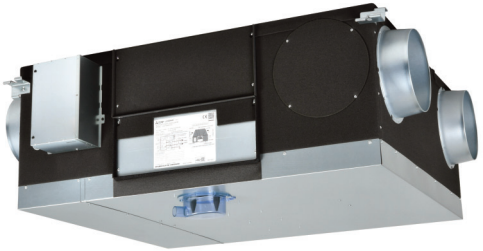
LGH-RVS-E

Commercial Lossnay

The **LGH-RVS-E** is designed to simultaneously extract stale air from a commercial building and supply fresh filtered air. Whilst doing this the Lossnay units also recover valuable heat energy for maximum efficiency.

Key Features & Benefits

- Fresh air ventilation with energy efficient heat recovery
- Plastic heat exchanger - perfect for higher humidity environments
- Optional Mitsubishi Electric energy saving CO_2 sensors allow automatic incremental fan control for a healthy indoor environment; sensors powered by Lossnay unit
- Four commissionable fan speeds, settable between 25-100%, with independent supply and return fan control offering low running costs and easier compliance to Part L
- Easy control interlock with Mr Slim and City Multi air conditioning systems, including M-NET connection for centralised control
- Integrated bypass damper for free cooling
- In-built condensate drainage traps



Compatible with Mitsubishi Electric plug-and-play CO_2 sensor (powered by the Lossnay unit)

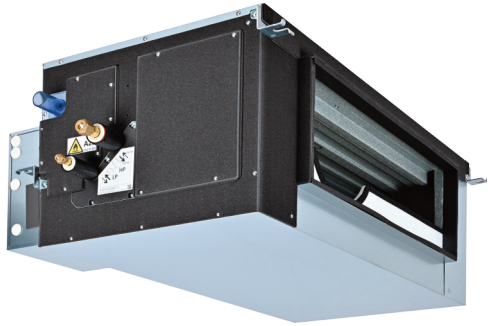
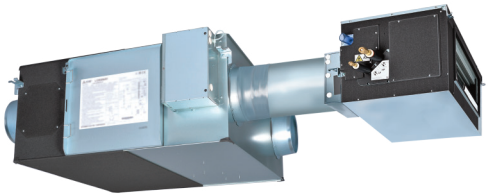
GUX-MS-E

Lossnay Outdoor Air Processing Unit





Designed to work seamlessly with City Multi YXM VRF and the Lossnay RVX(T)3 MVHR ranges, the **GUX-MS-E** delivers treated outdoor air with confidence. The DX coil provides heated or cooled fresh air into commerical applications improving comfort, simplifying design and giving installers and specifiers the reassurance of one trusted Mitsubishi Electric system.

Key Features & Benefits

- Seamless Air Treatment System - GUX units connect with City Multi YXM and Lossnay RVX(T)3 ranges to deliver a simple, effective solution for heated or cooled fresh air supply
- Lower GWP R32 Refrigerant - for reduced carbon impact and future-ready legislation compliance
- Optional Low Level Leak Detector (PAC-SL72SA-E) - provides long service life, easy maintenance and supports compliance and safety regulations
- Wide Airflow Capability (500–2500 m³/h) - delivers high airflow without the size, weight, or installation demands of traditional AHUs, enabling solutions where space is limited
- Flexible Air Control - supports return air temperature control with or without supply air temperature limit capabilities, enabling the right approach for each building while maintaining occupant comfort
- Outdoor Air Temperature Conditioning - provides greater control of incoming fresh air temperature, improving comfort and supporting flexible system design

VL-CZPVU-L/R-E

Residential Lossnay

The **VL-CZPVU-L/R-E** residential Lossnay range of Mechanical Ventilation with Heat Recovery (MVHR) units create an environment of constant clean and healthy air at home. These systems are designed to continuously extract from bathrooms, kitchens, toilets and utility rooms where air can become polluted, whilst supplying a balanced flow of fresh air from outside to spaces such as bedrooms and living rooms. The Lossnay unit minimises the energy lost by recovering the heat from the extracted air, transferring this to the supplied fresh air.

Key Features & Benefits

- Ultra quiet noise levels ensure minimal disturbance
- Optional filters placed within the MVHR unit for particulate matter and NOx allow for improved indoor air quality
- Full summer bypass function with auto mode and settable temperature parameters enable customisable control
- Digital controller included for ease of commissioning and operation
- Fan boost signal via live switch or volt free contact, with settable delay and overrun timers
- Cloud control enables remote monitoring and control
- Suitable for use in individual houses or in multi-residential apartment applications

CP-500CM-L/R

Cooling Module

Enhance your home's protection against overheating with the **CP-500CM-L/R** cooling module - perfectly paired with the VL-500CZPVU-L/R-E and VL-520CZPVU-L/R-E residential Lossnay MVHR. This innovative system delivers tempered fresh air to help prevent overheating, supporting compliance with Part O building regulations.

Featuring a self-contained direct expansion system, advanced inverter technology, and lower GWP R32 refrigerant, it provides efficient cooling while meeting sustainability targets.

Designed with Part O compliance at its core, it offers flexible activation temperatures, customisable capacity steps, and overshoot temperature controls, giving you total confidence in maintaining compliant indoor conditions.

Key Features & Benefits

- Multi-zone activation - connect up to four room temperature sensors to detect cooling requirements from different areas
- Low system height - efficient use of space, maximising a home's floor area by allowing other services to be placed underneath the system
- Quiet performance - enjoy a restful nights sleep even in the hottest summer's without the distraction of excess noise
- Eco-friendly & efficient - the inverter-controlled compressor uses lower GWP R32 refrigerant, delivering powerful cooling while reducing environmental impact
- Hassle-free installation - designed for simplicity, ensuring a smooth and efficient setup process
- Flexible airflow - operational airflow as low as 50l/s allows precise capacity selection for each home's unique needs
- Behind-the-scenes control - ensures adherence to Part O regulations, while preventing unnecessary end-user adjustments

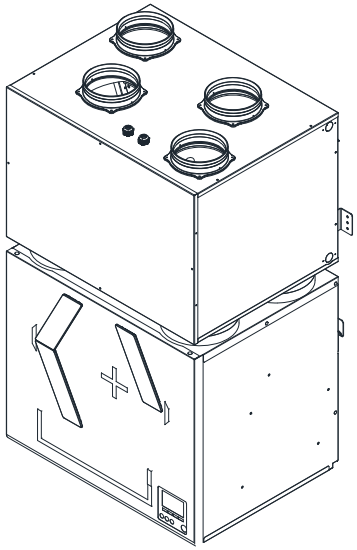
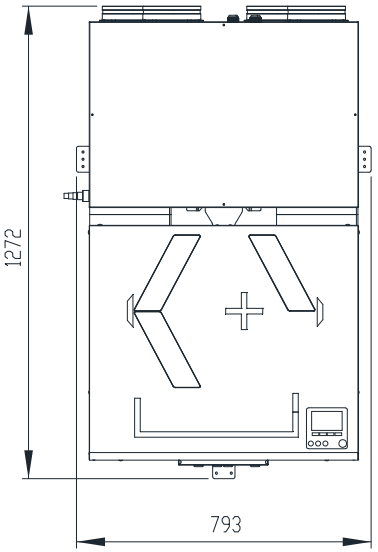
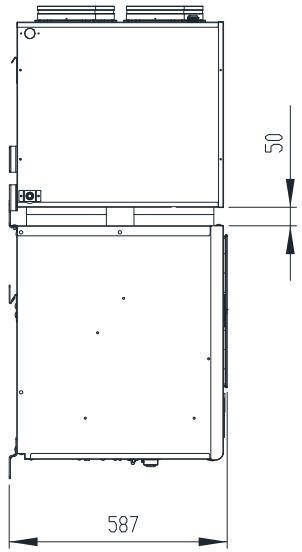
LOSSNAY + COOLING MODULE







s-AIRME-G07 HR-P C

Air Handling Unit

The Mitsubishi Electric AIRME Compact Air Handling Units (AHU's) incorporate a frameless structure to achieve a line-up of units that are as compact as possible, maximising air tightness and improving thermal properties.

The **s-AIRME-G07 HR-P** range of AHU's utilises a combination of Mr Slim R32 Power Inverter heat pump technology, energy efficient plate heat exchanger heat recovery technology, and an integrated control system. This integration of technologies results in highly advanced, efficient systems that are easy to install and commission, making them ideal for offices, shopping centres, theatres and other large, open spaces.

Key Features & Benefits

- Mr Slim R32 Power Inverter heat pump technology enables energy efficient tempering of fresh air
- Plate heat exchanger for effective heat recovery
- Self-supporting, one-piece construction for maximum air tightness and minimal thermal bridging
- Constant volume EC plug fans for greater efficiency and cost savings
- Easy air flow commissioning with selectable target air volume control
- Fully integrated controls and single point power supply, regardless of accessories, for ease of installation
- Wide range of optional accessories, making these units a perfect solution for a variety of applications

Weather canopy for outdoor installation	B541
Weather protection grille on fresh air intake	B621
Left handed configuration	2963

Note: *1 Post heating elements increase unit length size.

Controls

Control Solutions

Contents

The Importance of **Controls**

Time to take control

Operating an air conditioning, ventilation or heating system without effective controls can be costly in more ways than one. Not only are you likely to face higher monthly energy bills, it will also lead to an increase in carbon emissions - something that will become ever more important as businesses strive to keep up with tougher environmental legislation.

The right controls take building performance to the next level. With them, building systems become more responsive, easier to automate, monitor and maintain, and less costly to operate in the long-term.

The right controls can deliver a cost-effective solution that helps manage, monitor and report on the performance of all building services systems.

In order to achieve the UK's national objective of net-zero carbon emissions by 2050, commercial buildings will have to become much more energy efficient, and building controls will have a significant part in ensuring that happens.

Control technology is now widely available for buildings of all sizes, so it is possible to access the benefits whatever the scale or scope of your project.

Mitsubishi Electric technology

Mitsubishi Electric has been dedicated to producing energy efficient technology for over ninety years. Controls are an essential part of that. Mitsubishi Electric has long heritage in factory automation where the company leads the field in providing controls that enhance productivity, efficiency and energy use.

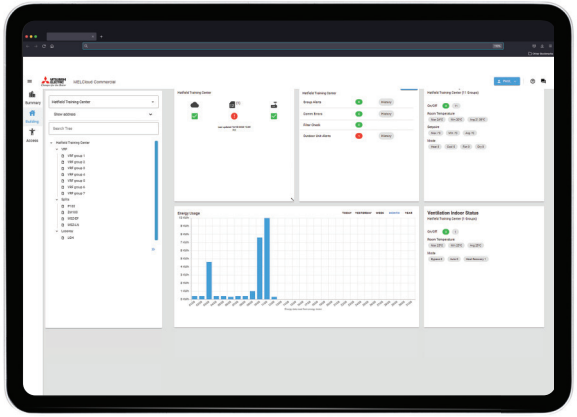
We have taken this extensive knowledge and experience and transferred it to the heart of our building services equipment.

We were also one of the first manufactures to provide an open gateway to our products to make integration easier for our customers. This enables direct connection of equipment into many common building energy management system (BEMS) platforms.

Mitsubishi Electric now offer the MELCloud platform to help you control, monitor and service your HVAC equipment. This includes performance and energy monitoring, as well as remote management of one or multiple systems, in order to save energy, cost and downtime.

From a simple hand-held controller to a centralised BEMS, Mitsubishi Electric puts its customers in control.

MELCloud COMMERCIAL



The European Standard EN 15232

"Energy Performance of Buildings - Impact of Building Automation, Controls and Building Management" was compiled in conjunction with the Europe-wide implementation of the directive for energy efficiency in buildings (Energy Performance of Buildings Directive EPBD) 2002/91/EG.

The Standard is incorporated into UK law and describes methods for evaluating the influence of building automation and technical building management on the energy consumption of buildings.

Four efficiency classes A to D have been introduced to this purpose. After a building has been equipped with building automation and control systems, it will be assigned one of these classes. The potential savings for thermal and electrical energy can be calculated for each class based on the building type and building purpose. The values of the energy class C are used as the reference for comparing the efficiency.

The diagram on the right, shows the differences in energy consumption for three building types in the energy efficiency classes A, B and D relative to the basis values in rating C. For example, by using class A, 30 % of the thermal energy can be saved in offices.

BS EN 15232: Function list and assignment to energy performance classes

	Heating / Cooling Control	Ventilation / Air Conditioning Control	Lighting	Sun Protection
A	☐ Individual room control with communication between controllers ☐ Indoor temperature control of distribution network water temperature ☐ Total interlock between heating and cooling control	☐ Demand or presence dependent air flow control at room level ☐ Variable set point with load dependant compensation of supply temperature control ☐ Room or exhaust or supply air humidity control	☐ Automatic daylight control ☐ Automatic occupancy detection manual on / auto off ☐ Automatic occupancy detection manual on / dimmed ☐ Automatic occupancy detection auto on / auto off ☐ Automatic occupancy detection auto on / dimmed	☐ Combined light / blind / HVAC control
B	☐ Individual room control with communication between controllers ☐ Indoor temperature control of distribution network water temperature ☐ Partial interlock between heating and cooling control (dependent on HVAC system)	☐ Time dependent air flow control at room level ☐ Variable set point with outdoor temperature compensation of supply temperature control ☐ Room or exhaust or supply air humidity control	☐ Manual daylight control ☐ Automatic occupancy detection manual on / auto off ☐ Automatic occupancy detection manual on / dimmed ☐ Automatic occupancy detection auto on / auto off ☐ Automatic occupancy detection auto on / dimmed	☐ Motorised operation with automatic blind control
C	☐ Individual room control with communication between controllers ☐ Indoor temperature control of distribution network water temperature ☐ Partial interlock between heating and cooling control (dependent on HVAC system)	☐ Time dependent air flow control at room level ☐ Constant set point of supply temperature control ☐ Supply air humidity limitation	☐ Manual daylight control ☐ Manual on / off switch + additional sweeping extinction signal ☐ Manual on / off switch	☐ Motorised operation with manual blind control
D	☐ No automatic control ☐ No control of distribution network water temperature ☐ No interlock between heating and cooling control	☐ No air flow control at room level ☐ No supply temperature control ☐ No air humidity control	☐ Manual daylight control ☐ Manual on/off switch + additional sweeping extinction signal ☐ Manual on/off switch	☐ Manual operation for blinds

Section from table 1 of the BSEN 15232:2007 [D]

Building Automation and Control (BAC) efficiency classes to EN 15232

		Efficiency factor for thermal energy			Efficiency factor for electrical energy		
		Office	School	Hotel	Office	School	Hotel
A	High energy performance building automation and control system (BACS) and technical building management (TBM)	0.70	0.80	0.68	0.87	0.86	0.90
B	Advanced BACS and TBM	0.80	0.88	0.85	0.93	0.93	0.95
C	Standard BACS	1	1	1	1	1	1
D	Non energy efficient BACS	1.51	1.20	1.31	1.10	1.07	1.07

The Importance of Controls

The Internet of Things

The Internet of Things (or IoT) describes the revolution already under way, with a growing number of internet-enabled devices that can network and communicate with each other and with other web-enabled devices.

Mitsubishi Electric is at the forefront of this revolution and all our products are now connectable to the internet using the following solutions.

Features	MELCloud Home	MELCloud Commercial
		Connect to	Wi-Fi	Ethernet or Cellular
Compatibility	Air Conditioning and Heating	Air Conditioning and Ventilation
Third party control	x	✔ (with option PAC-YG60/63MCA/66DCA)
SIM card provided	x	✔ (eSIM)
Smartphone application	✔	✔
Tablet application	✔	✔
Web portal	✔	✔

Which Controls Product for Which Application?

Good controls will benefit any application. With a wide portfolio of control products, it is important to select the right control solution for each application.

APPLICATION	SIZE	TYPICAL PRODUCT INSTALLED	CONTROL SOLUTIONS	CASE STUDY
OFFICE	SMALL	City Multi VRF Systems Mr Slim Split-Systems Mr Slim IT Room Applications	PAR-42MAAB AE-C400E or AT-50B PAC-YG66DCA or PAC-YG60MCA MELCloud Commercial MELCOBEMS SIP+	Wholesaler PACAIR uses a Mitsubishi Electric Centralised Controller to provide complete control of the office air conditioning. The 10.4" touch screen controller and easy to use interface gives PACAIR the ability to set up a weekly time schedule, as well as offering a host of energy saving features.
	LARGE	City Multi VRF Systems City Multi Air Curtains City Multi PWFY Heat Pumps	PAR-42MAAB AE-C400E or AT-50B MELCloud Commercial MELCOBEMS SIP+	Mitsubishi Electric's Hatfield headquarters has been updated to new AE-C400E / EW-C50E controls to monitor and control all of the air conditioning equipment across 3 floors and 2 wings. This enables the system to operate as efficiently as possible, incorporating easy to use controls and allows for fully programmable scheduling that accommodates flexible working patterns.
HOTEL	SMALL	City Multi VRF Systems	PAR-CT01MAA-S/PB AE-C400E MELCloud Commercial MELCOBEMS SIP+	The luxury 4-star Kingsmills Hotel provides a chic and contemporary venue for discerning Highlands travellers and focuses on relaxation, revitalisation and calm. The centralised controller delivers the efficiency and flexibility that both the hotel and its guests need, with air conditioning integrated with the room key card system combined with simple to use room controllers.
	LARGE	City Multi VRF Systems	PAR-CT01MAA-S/PB AE-C400E MELCOTEL2™ MELCloud Commercial MELCOBEMS SIP+	The Premier Inn Hotel, Leicester uses the MELCOTEL2™ control interface to efficiently and effectively control air conditioning that provides heating and cooling to 135 bedrooms, the bar, restaurant and back offices. A variety of control strategies were implemented and monitored and analysed, resulting in a 30% decrease in average monthly system running costs and CO_2 emissions.
RETAIL	SMALL	Mr Slim Split-System Mr Slim Air Curtains	MELCORETAIL MINI MELCloud Commercial MELCOBEMS SIP+	Costa Coffee was one of the first to make use of the MELCORETAIL MINI to capitalise on its energy saving feature whilst ensuring that customers and staff were comfortable in the overall coffee shop environment. Across a year of monitoring the MELCORETAIL MINI helped achieve a 20% reduction in energy use, giving it a payback period of less than 2 months.
	LARGE	City Multi VRF Systems City Multi Air Curtains	MELCloud Commercial MELCOBEMS SIP+	A pilot site for a major high street retail chain has demonstrated how connecting MELCloud Commercial to air conditioning can highlight ways of reducing energy or identify unnecessary use. Significant savings throughout the store were made by employing MELCloud Commercial, providing a consistent return on investment on a monthly basis.
LEISURE	SMALL	Mr Slim Split-System Mr Slim Air Curtains	MELCOBEMS MINI (A1M+) MELCloud Commercial MELCOBEMS SIP+	The Castle golf course at St Andrews need a heating and cooling system that was as controllable and efficient as possible. The M2M interface controls and monitors the air conditioning to make sure it maximises energy saving, whilst allowing for continuous fine-tuning according to the golf clubs needs.
	LARGE	Mr Slim Split-System Mr Slim Air Curtains City Multi VRF Systems City Multi Air Curtains	MELCOBEMS MELCloud Commercial MELCOBEMS SIP+	Fitness First uses monitoring BEMS to communicate with the air conditioning using Modbus, across its UK network. Dedicated Modbus Interfaces offer complete monitoring and control of the system and highlights the flexibility and potential for reducing running costs that our control systems have when working in conjunction with third party BEMS.
RESIDENTIAL	SMALL	Ecodan	MELCloud Home	A WW2 veteran has shown the way to a sustainable future with the installation of a hybrid Ecodan air source heat pump to work alongside his existing gas boiler. The hybrid system is designed specifically to work in conjunction with conventional boilers and the MELCloud Home Wi-Fi system also allows the heat pump to be monitored and controlled remotely
	LARGE	Ecodan	MELCloud Home AE-C400E	The renewable heating system for St Mungo's in Lewisham needs to cope with different heating loads and deal effectively with regular changes in tenancy and occupied hours. It also had to offer tenants the ability to alter the temperature of their individual flats, whilst allowing the charity full central control of the system.

Which Controls Product for Which Function?

With a wide portfolio of control products, many functions are available.
It is important to select the right control solution for each function.

FUNCTION	SMALL SYSTEM SIZE LARGE					NOTES

Centralised Controllers

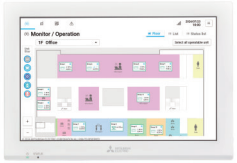
A wide range of centralised controllers are available to monitor and control our equipment efficiently. Some of our centralised controllers can also be used to monitor and control third party equipment.

Key Features & Benefits

AT-50B

- 5'' basic touch screen
- Centralised controller
- Monitor and control up to 50 indoor units
- Monitor and control general equipment

AE-C400E



- 12.1“ capacitive touch screen, including high sensitivity, multi-touch support, better durability and improved clarity
- Centralised controller
- Monitor and control up to 50 indoor units (or up to 400 with EW-C50E)
- Designed for cloud connectivity - MELCloud ready
- USB C port
- Browser based
- 4G Ready - SIM or Antenna
- 3rd party energy meter inputs
- BMS connection ready - fixed IP address
- WEB-USER Pin code pre-installed

EW-C50E

- Extends capability of AE-C400E
- Web based controller
- Monitor and control up to 50 indoor units
- Monitor and control general equipment
- Energy monitoring, load shedding
- Onboard web browser
- Optional direct BACnet connection
- USB C port

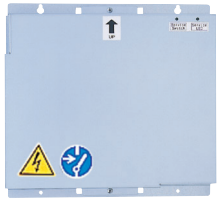
MITSU10001-ROUTER-CPT

- QuSpot antenna cellular solution, including router
- Integrated solution with multi band antennas in one enclosure
- Perfect for sites where LAN connection is not available
- 4G LTE
- IP 67
- Mounting brackets included
- Versatile use (mobile and fixed installations)

PAC-SC51KUA

- M-NET power supply

PAC-SF46EPA



- M-NET transmission booster

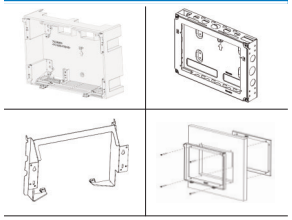
AE-C400E ACCESSORIES



PAC-YK92TB-J

Wall Mounting Attachment

Used to attach the AE-C400E on to the surface of a wall. Ideal accessory where a recess in the wall isn't available.

Dimensions (mm): 304 x 94 x 209

PAC-YK94UTB-J

Electrical Box - In-wall Enclosure

Use to help protect and contain the AE-C400E within the wall.

Dimensions (mm): 346 x 60 x 230

PAC-YK96TK-J

Mounting Kit for Control Panel

For use when the AE-C400E is required to be installed inside a control panel enclosure with DIN Rail.

Dimensions (mm): 299 x 73 x 203

PAC-YK91RF-J

Replacement Wall Mounting Attachment

Replacement kit for mounting an AE-C400E to the wall.

Dimensions (mm): 293 x 20 x 203

Remote Controllers

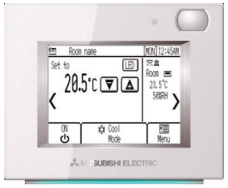
From a simplified controller perfect for hotel applications to a full backlight touch screen controller, we have the right remote controller to choose from.

Key Features & Benefits

PAR-CT01MAA-SB / PAR-CT01MAA-PB

- Simple to use
- Touch screen
- 180 colour screen
- 180 colour font display
- Backlight
- Fully configurable via smartphone App
- Customisable display
- Ability to display customer logos

PAR-U02MEDA



- Touch screen M-Net Controller
- Night set back, scheduling, setpoint limitation
- Built in occupancy/brightness sensor
- Backlight
- 0.5°C Set Point adjustment
- Dual Set Point

PAR-42MAAB / PAR-42MAAPB

- Audible and visual leak alarm
- Displays model name and serial number on Mr Slim
- Night set back, scheduling, setpoint limitation
- 0.5°C Set Point adjustment
- Dual Set Point
- Run/Standby for Mr Slim
- Contact number under fault condition
- Backlight (White / Black options)
- Daylight saving function

PAR-FL32MA / PAR-FA32MA

- Infrared solution
- Controller and receiver
- Controller able to control more than one receiver

PZ-62DR-EB

- Dedicated Lossnay controller
- Night set back, scheduling
- Flexible night purge
- Backlight

PAR-SL103A-E

- Wireless controller
- Weekly timer
- 3D Total Airflow for PLA-ZM/M
- 14°C cooling
- Individual vane setting for PLA-ZM/M/SM
- Dual Set Point
- Backlight

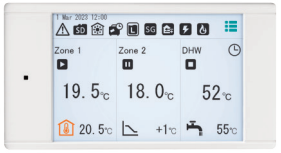
PAR-W31MAA / PAR-W21MAA

- Dedicated remote controller (see technical specification on page 7.18)
- Button lock
- Contact number under fault condition
- Fault codes

PAR-WT60R-E / PAR-WR61R-E

- Ecodan wireless controller
- New sleek flat panel design
- Backlight
- Ecodan receiver

PAC-IF082B-E



- Ecodan controller
- Touch Screen

Solution Interfaces

Our dedicated solution interfaces now include new sector specific products such as our new **MELCloud Commercial** offering.

Key Features & Benefits

MELCLOUD COMMERCIAL

- Advanced remote control of indoor units across one or multiple sites
- Smart monitoring of outdoor unit performance for one or multiple buildings
- Energy monitoring via in-built CT Clamps or Modbus Energy Meters, for improved energy consumption & cost savings
- Real-time system data of indoor and outdoor units facilitates performance analysis, service, and ongoing maintenance
- Choice of subscription packages to meet customer requirements

MCC-50E

- Compatible with M Series, Mr Slim, City Multi and Lossnay ranges
- Cloud system connection device - MELCloud Commercial IoT platform
- 4G or LAN connection
- Remote access to control, monitor and provide service & maintenance for up to 50 indoor units

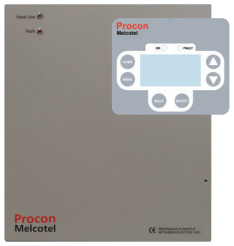
MELCLOUD-CL-HA1-A1

- IoT Interface - MELCloud Home and MELCloud Commercial*
- LAN or Cellular options. Cellular and MELCloud Home option includes data plan** via eSIM
- Remotely control indoor and outdoor units
- Remote service and maintenance*
- Update interface software OTA (over the air)
- Wall mountable - bracket supplied

MELCOMMS MINI

- Monitor and control up to 8 indoor units
- Run / Standby panel
- Includes 2 x MELCOBEMS MINI (A1M+) Interfaces

MELCOTEL2



- Monitor and control up to 200 indoor units
- Dedicated hotel interface
- Key card and non key card integration
- Automatic Setpoint adjustment
- Occupied / Unoccupied Settings Reset

ENERGY METERS

- Backlit LCD display
- Single-phase energy analyser
- DIN-rail mount

* MELCloud Commercial compatibility expected end 2026. ** 10 yr up to 100 MB data plan (renewable).

Simple Interfaces

A wide range of interfaces are available to allow third party equipment to monitor and control our units. Some interfaces are also available to monitor and control third party equipment from our centralised controllers.

Key Features & Benefits

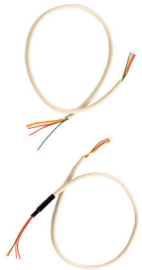
PAC-SA89TA

- Also known as 3 wire adaptor
- Remote on/off
- Fire alarm input
- Night mode
- Demand control

PAC-SA88HA

- Heating and cooling signal
- Run and fault signal

PAC-YT51HAA



- Remote on/off
- Fire alarm input
- Common run and fault signal

PAC-YG10HA

- Remote on/off
- Fire alarm input
- Common run and fault signal

PAC-SK15MA-E

- Adaptor to connect Mr Slim PUZ-ZM35/50 units to M-NET

PAC-SJ95MA-E

- Adaptor to connect Mr Slim units to M-NET

PAC-SL16MA-E

- Adaptor to connect Mr Slim PUZ-ZM100-140 / PUZ-M200/250 units to M-NET

Advanced Interfaces

A wide range of interfaces are available to allow third party equipment to monitor and control our units. Some interfaces are also available to monitor and control third party equipment from our centralised controllers.

Key Features & Benefits

KTR-53A

- Remote on/off
- Run and fault volt free outputs

MELCORETAIL MINI

- On/off, fire alarm and lock input
- Setpoint and fan speed input
- Run, fault, heat and cool output
- 2 energy saving features

PAC-YG60MCA

- Monitor up to 4 energy meters

PAC-YG63MCA

- Monitor up to 2 temperature sensors

PAC-YG66DCA

- Monitor and control up to 2 pieces of general equipment

MAC-497IF-E

- Adaptor to connect remote controller to M Series
- Adaptor to connect M Series to M-NET

MAC-334IF-E

- Adaptor to connect remote controller to M Series
- Adaptor to connect M Series to M-NET
- 3rd party heating interlock

MAC-597IF-E

- Wi-Fi Interface for MELCloud Home solution
- ATA and ATW support
- WPS and Wi-Fi pin pairing
- WPS Push mode
- Setting via PAR-42MAAB / PAR-SL103A-E

BEMS Interfaces

Building Energy Management Systems (BEMS) will allow a building to run efficiently. A wide range of interfaces are available to connect our systems simply to a BEMS.

Key Features & Benefits

MELCOBEMS MINI (A1M+)

- BACnet / Modbus IP
- Configuration via onboard webpage (local network)
- Firmware update over Ethernet (local network)
- Individually monitor and control indoor and outdoor unit (1 x A1M+ per unit)
- DIN rail mount option

MELCOBEMS MINI (KNX A1M+)

- KNX & BACnet / Modbus IP
- Configuration via onboard webpage (local network)
- Firmware update over Ethernet (local network)
- Individually monitor and control indoor and outdoor unit (1 x A1M+ per unit)
- DIN rail mount option

MELCOBEMS2

- Monitor and control up to 50 indoor units
- Modbus and BACnet interface
- Energy monitoring

MELCOBEMS SIP+

- Control and Monitor up to 50 indoor units (up to 200 with EW-C50E)
- Multiprotocol, allowing data to be disseminated to one or many BMS, EMS & IoT systems
- Energy Monitoring

IQ4 XNC

- Monitor and control up to 50 indoor units
- Trend interface

IQ5 XNC

- Monitor and control up to 50 indoor units
- Trend interface

BEMS Interfaces

Key: DI = Digital Input. DO = Digital Output. AI = Analogue Input. AO = Analogue Output.

Notes:
The PAC-YG***CA are not compatible with MELCOBEMS2, IQ4 XNC and IQ5 XNC.
IQ4 XNC / IQ5 XNC controllers are not directly compatible with Mitsubishi Electric AE-C400E / EW-C50E controllers due to differing TLS versions used by each product.
A SIP IPe Melco Proxy device will need to be purchased along side the IQ4 XNC / IQ5 XNC device to enable communication.

How to Quote

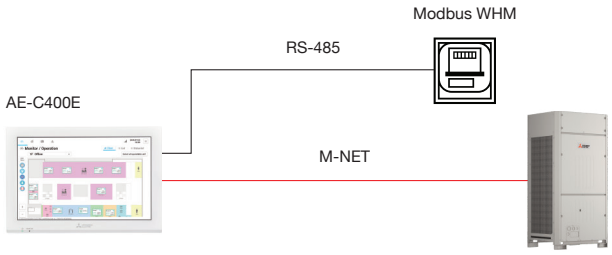
How to quote an AE-C400E System Controller with Energy Monitoring

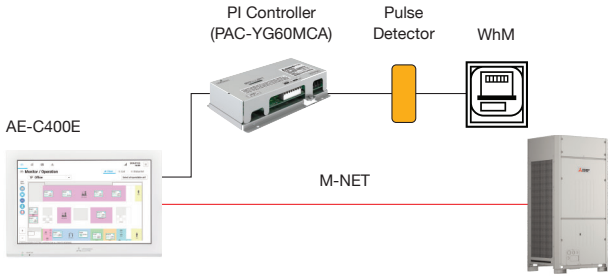
Energy Management

The AE-C400E and EW-C50E centralised controllers come with the Energy Management function. Please obtain a PIN to activate this via the Mitsubishi Electric MELServe Technical Services department.

- 4x Modbus Energy Meters can be connected directly to the centralised controller
- 4x Pulse Energy Meters can be connected to the centralised controller via PAC-YG60MCA PI Controller

Modbus or Pulse Meter Connection





How to Quote Energy Apportioning

Note: Must use Pulse Energy Meters for energy apportioning. Modbus Energy Meters will be compatible for energy apportioning from Q2 2026.

START

QUOTE FOR 1-8 AE-C400E OR EW-C50E

QUOTE FOR 1-8 ENERGY APPORTIONING PIN CODES
Only invoice for 1 PIN code

QUOTE FOR PAC-YG60MCA PI CONTROLLER(S)

LAN CONNECT AE-C400E & EW-C50E

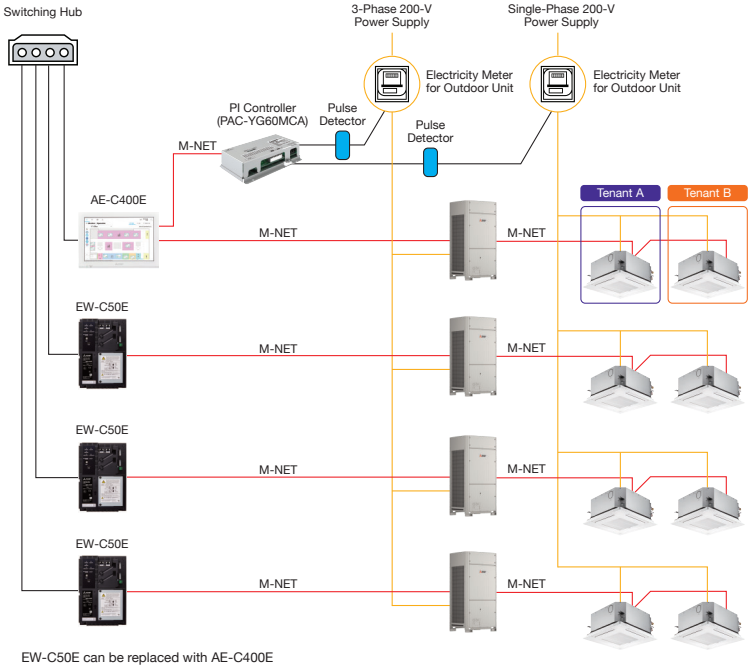
CONNECT PAC-YG60MCA PI CONTROLLER(S) AND PULSE ENERGY METERS

QUOTE 3 DAYS FIELD SERVICE COMMISSIONING

END

Example of Energy Apportioning System

Recommend 1 x Pulse Energy Meter per outdoor unit to improve granularity of data.

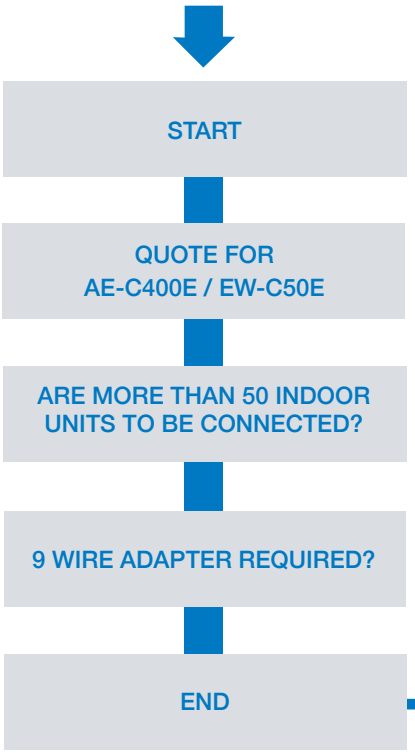


EW-C50E can be replaced with AE-C400E

How to Quote

How to quote an AE-C400E System Controller & BACnet Option

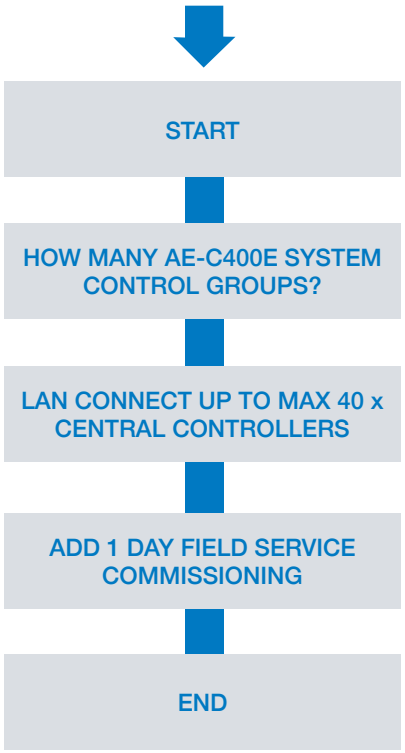
How to quote up to 400 indoor units



Quote for 1-8 x AE-C400E / EW-C50E for expansion up to 400 indoor units to create system control group

Quote for 1 x PAC-YG10HA per AE-C400E & EW-C50E

How to quote up to 2,000 indoor units



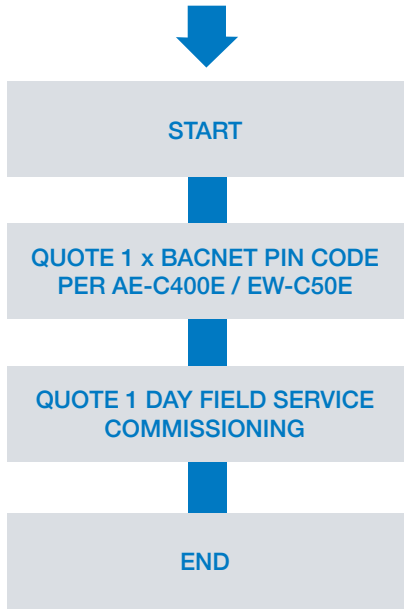
The comprehensive management browser allows the monitoring and control of up to 2,000 indoor units connected to a maximum of 40 x AE-C400E / EW-C50E controllers

Quantity of AE-C400E / EW-C50E system control groups from up to 2,000 indoor selections

LAN connect all centralised controllers together with CAT5/6 cable - max 100m distance from each AE-C400E / EW-C50E to Hub/Switch

Quote for 1 x day field service commissioning

How to quote BACnet Option



Quote for 1-8 x BACnet pin code per AE-C400E / EW-C50E system control group. Invoice for 1 PIN code

Quote for 1 x day field service commissioning

Services

Support at every step of the way

Support at every step of the way

At Mitsubishi Electric, we have not only developed an innovative range of cooling, heating, ventilation and control solutions, we have also examined how we support the market throughout the complete lifecycle of our products - from cradle to grave.

Whether in pre-sales design and specification, installation, or service and maintenance support, right through to our recycling programme, we can offer solutions that deliver the quality and excellence you would expect to make a world of difference.

MELServe Technical Services

Advanced, reliable technical support at every step of the way

Meeting today's energy challenges for our commercial premises demands more integrated thinking from everyone involved in the design, supply, installation, commissioning and maintenance of essential building services - whether it is for an individual property or a national estate.

Ever increasing energy bills, the need to reduce carbon emissions and a raft of challenging legislation are driving the demand for increased energy efficiency and control in the cooling, heating, ventilation and associated technologies that we use.

As a manufacturer, we realise that product development alone is not enough. To keep our products working at their optimum, we have developed the MELServe approach to ensure our customers are able to maximise the energy efficiency of their building's services right from the start.

MELServe offers a range of support that includes:

- Site Services
- 24/7/365 Technical Help Desk
- Spare Parts, Warranty & Returns
- CPD Accredited Technical Product Training

Whatever the challenge, we're here to help you meet it.

MELSERVE
By Mitsubishi Electric

Commissioning

Our assisted commissioning service is aimed at both new and existing customers; the objective is to demonstrate how to commission our systems effectively, so that customers can carry out these tasks unassisted in the future.

Our commissioning service is available across our full product range including: **Air Conditioning, Controls, Hybrid VRF, e-Series Chillers and Commercial Heating products**.

During the commissioning process, our engineers will carry out the following tasks:

- Comprehensive inspection of the installed system to ensure the system meets Mitsubishi Electric specification
- Check the system addressing and advise on any incorrect settings
- For systems other than controls we will operate in both cooling and heating modes where applicable and record temperatures, pressures and water flow rates for the system

Type of Commissioning	Detail
Air Conditioning	Max 2 City Multi systems per day
Controls	1 x AE-C400E and up to 4 x EW-C50E per day
Hybrid VRF	Max 1 City Multi Hybrid VRF system per day
e-Series	Max 2 chillers per day
Commercial Heating	Ecodan CAHV - Max 2 units per day* Ecodan QAHV - 2 day commissioning visit (includes 1/2 day mid-install visit)*

Control System	Commissioning Days	Charge Pin Codes	BACnet Pin Code
1 x AE-C400E + 1-4 EW-C50E	1 day	1 - 5	1 - 5
2 x AE-C400E + 1-4 EW-C50E	2 days	1 - 10	1 - 10
3 x AE-C400E + 1-4 EW-C50E	3 days	1 - 15	1 - 15
4 x AE-C400E + 1-4 EW-C50E	4 days	1 - 20	1 - 20
5 x AE-C400E + 1-4 EW-C50E	5 days	1 - 25	1 - 25

Whilst our engineer will supervise the successful completion of all tasks and address any questions or skill gaps that present themselves, it is the responsibility of the installing contractor under supervision to carry out all of the listed tasks. It is the responsibility of the customer to complete and submit the commissioning logbooks to Mitsubishi Electric unless specified.

*Transit bolts must be removed before we arrive on site. If transit bolts are not removed additional time and cost may be incurred.

For BACnet and/or Energy commissioning, the above times are guidance only and may differ based on quantity of units/systems.

Fault Finding

Our Fault Finding service is carried out on new and existing installations to identify problems and offer resolutions to ensure the system is returned to a fully operational condition in the shortest possible timeframe.

Our Fault Finding service is available across our entire product range. During the Fault Finding process, our engineers will carry out assessments of the following to determine a resolution:

- System design, application and specification
- Standard of installation
- Operational performance of equipment
- Current and historic fault codes

Product	Detail
Air Conditioning	One day per reported fault
Controls	One day per reported fault
Hybrid VRF	One day per reported fault
e-Series Chillers	One day per reported fault
Commercial Heating	One day per reported fault

Note: Whilst our engineers will carry out a thorough assessment of the system and provide recommendations to rectify any issues, they do not carry spare parts and cannot provide a same day resolution in the event of part failure. If equipment failure due to manufacturing is discovered, no cost will be raised and the visit will be carried out F.O.C. It is the responsibility of the customer to provide access to all of the affected equipment on site. Whilst our engineer will identify any installation and setup issues that are affecting performance, it is the responsibility of the contractor to rectify any problems.

MELSERVE
By Mitsubishi Electric

Health Checks

Our Health Check service is carried out on existing installations to ensure that the system is operating within our design parameters. The service is available to both new and existing customers and the objective is to establish a fully operational system.

Our Health Check service is available for the following product ranges: Air Conditioning including Hybrid VRF, e-Series Chillers and Commercial Heating products. During the Health Check process, our engineers will carry out the following tasks:

- Comprehensive visual inspection of the installed system to ensure the system meets Mitsubishi Electric specification
- Check the system addressing and advise on any incorrect settings
- Full operation in both cooling and heating modes where applicable
- Record operating data including temperatures, pressures and water flow rates of outdoor units, BC Boxes and indoor units to determine the correct operation

Product	Detail
Air Conditioning	Up to 3 systems per day
Hybrid VRF	Up to 2 systems per day
e-Series Chillers	Up to 4 systems per day
Commercial Heating	Up to 3 systems per day

Note: Whilst our engineer will ensure the successful completion of all tasks and address any questions or skill gaps that present themselves, it is the responsibility of the contractor to provide access to all equipment. Whilst our engineer will identify any installation and setup issues that are affecting performance, it is the responsibility of the contractor to rectify any problems.

City Multi Stripdown

For installations where the City Multi outdoor unit(s) cannot be moved to the final location, Mitsubishi Electric offer a City Multi strip down service. Other products are available on request, please contact us for further information should you have a specific strip down requirement.

Chiller Service and Maintenance for Central Plant and IT Cooling

We are now able to bring Mitsubishi Electric quality to your service and maintenance contract, using the very latest technology for in-field reporting and diagnostics. Our highly trained and qualified chiller service and maintenance engineers are based nationwide, operating from our network of service offices. Our engineers are experienced in the servicing, maintenance and repair of chiller systems across the industry.

What we do:

- Comprehensive service and maintenance plans
- National coverage (four dedicated service centres)
- Fast response times
- Reactive-response and call-out service
- Spare parts
- F-Gas and REFCOM Elite accredited engineers
- 24/7 365 emergency call out service
- Service and maintenance for all manufacturers' applied products
- Commissioning / Start-up
- System checks
- Fault finding
- Extended warranties
- Strip-downs (model / application specific)

MITSUBISHI ELECTRIC UK
TRAINING ACADEMY

Product Training

Mitsubishi Electric provide specific, in-depth training at our state-of-the-art training centres across the UK, or via our award-winning online training, covering all aspects of installation, from design through to maintenance.

Providing product training for all levels of expertise, our courses are taught by experienced engineers, with a wealth of knowledge and are all CPD accredited. In addition to the CPD courses, we can also now offer LCL Level 3 Regulated Quality Framework (RQF) qualifications for heat pumps.

CPD CERTIFIED

Design and Consulting Services

As part of the Mitsubishi Electric commitment to supporting robust application of our leading technologies, a team of consultant sales professionals work nationally with mechanical building services specifiers and consultants to achieve early engagement in project design.

Clients are able to apply cooling, heating, ventilation and controls confidently within their individual projects, with the emphasis on a solution-based philosophy to support ‘as-designed’ performance and efficiencies.

This approach helps projects realise ‘as-specified’ performance and efficiency levels - all designed to achieve the most efficient and cost-effective outcome for the building operator, whilst reducing the overall environmental impact.

As initial designs move from the drawing board through planning, procurement, installation and commissioning, to on-going operation and use, we work closely with our customers to balance capital expenditure, system efficiencies, installation costs, control strategies and running costs.

Working in the real world

At Mitsubishi Electric, we understand the real-world pressures of delivering commercial projects for your clients. Our dedicated team can support M&E contractors and help you tackle the challenges associated with a range of projects, including change of building layout (design evolution) without compromising the original design or performance criteria.

We also understand the link between effective design and achieving the best outcomes for building owners, operators, and users. The goal of our team is therefore to ensure robust design and implementation; every step of the way, from concept to commissioning.

Getting the right balance between capital cost, system efficiencies, installation costs and operating costs are key areas where we can support you. Each Business Development Manager has extensive product knowledge and application experience and is here to help with everything, including guidance on new and changing legislation.

PARTNER Programme

Mitsubishi Electric Partner Programme

The Mitsubishi Electric Partner Programme is inclusive and open to all qualifying air conditioning and heating installation companies, large or small.

Using the world-renowned Mitsubishi Electric brand, we will train, support and promote all qualifying companies as part of our aim to drive the industry forwards. Mitsubishi Electric recognises the importance of forging lasting relationships with professional companies who install our equipment. Our Partner Programme enables us to do just that.

Established in 2005 and designed to raise industry standards, our industry leading Partner Programme assures end users of a consistently high level of installation and after sales service that supports our systems. To be eligible to join our scheme in the first instance, prospective installation Partners must comply with the necessary building regulations and meet specific industry, programme and CSR standards.

All Partners are reviewed on a regular basis to ensure they continue to meet the required standards that makes them eligible to be part of the Mitsubishi Electric Partner Programme.

Grow Your Business
with Mitsubishi Electric

Partner Programme Benefits

Dedicated Partner Programme Team

Our dedicated Partner Programme Team are on hand to give Partners the support they need.

Mitsubishi Electric Customer Portal

We have developed our Customer Portal to help our Partners grow their business by enhancing their online presence on channels such as social media and via their own website. Product images, social media copy, easy to follow strategy guides and marketing training videos are just a few examples of free content that can be accessed.

Take a look today and see how you can use this to grow your business:
les.mitsubishielectric.co.uk/Security/login

Co-Marketing / Relationship Development Fund (RDF)

We will work with Partners to promote our relationship and generate awareness of the unique business benefits of the Partner Programme to end-users. We operate a Partner Programme Relationship Development Fund (RDF) allocated in relation to their commercial activities with Mitsubishi Electric.

Digital Marketing Packages

We're able to offer an exclusive and flexible digital marketing package for our Partners, using their RDF to increase their brand awareness.

Online Workwear and Promotional Goods Portal

Partners can take advantage of their RDF to enhance their company image with dual branded work wear and promotional items. We offer items such as: RAB and The North Face jackets, beanies, polo shirts, Stanley cups, pens, notepads and so much more.

Product and Industry Training

Our Partners receive a free allocation of training courses and additional courses can be funded from their Relationship Development Fund.

Extended Warranty

Partners can offer their customers up to 10 year warranty on selected products. Subject to T&Cs.

Committed Carbon Reduction Partner (CCRP)

Partners have access to a new accreditation reflecting a commitment towards sustainable practices. The CCRP accreditation will provide a competitive advantage for our Partners, showcasing a proven dedication to reducing the operational carbon footprint through an annually calculated reduction plan, helping them on the road to Net Zero.

COMMITTED CARBON REDUCTION PARTNER

Carbon Footprint Calculation

Partners are invited to use their RDF to conduct a Carbon Footprint Calculation of their business, a crucial step on the road to net zero. We've made this a simple process via our Partner portal, with the calculation work conducted using an approved supplier.

24hr Technical Support

To assist our Partners in the maintenance of our equipment, we have a dedicated technical support team who will endeavour to speedily diagnose faults and offer solutions to the problems our Partners may encounter.

Find An Installer

Mitsubishi Electric works to promote our Partners through our 'Find an installer' web page, highlighting specific Partners to contact, depending on the type of project a consumer has.

Business Support Tools

We have made it easier to do business with Mitsubishi Electric through the introduction of new technologies and our business tools available to Partners.

Factory Visits & Events

Our Partners and their clients will have the opportunity to witness first-hand the manufacture of air conditioning and Ecodan units at our manufacturing facility in Scotland. We organise regular factory visits to our manufacturing facility in Scotland, along with other events designed to develop our Partners expertise and support them in growing their business.

Mitsubishi Electric Deliveries

At Mitsubishi Electric, we realise that our customers' businesses can depend on getting the right equipment on site at the right time.

That's why we have developed a comprehensive and flexible delivery programme with one of the longest delivery windows in the industry. With the ability to offer timed, weekend and Public Holiday deliveries, coupled with free 'Text Ahead' and 'Ring Ahead' functions, we aim to keep our customers informed every step of the way.

Delivery Notes
Cut off for next day deliveries is 1.00pm on the working day prior to delivery, or 2.30pm for orders placed via e-shop
Standard weekday delivery is between 8.00am and 5.30pm for pallet deliveries, and 7.00am and 7.00pm for parcel deliveries
AM / PM / Timed / Weekend / Public Holiday deliveries are all available (additional notice needed and charges will apply - please refer to full delivery guidelines for further details)
Standard delivery will normally be made on an 18T rigid lorry equipped with a tail lift and a single driver with a pump truck
Other vehicle types will be utilised dependant on any site access issues and delivery size
If there are access restrictions at your nominated delivery point and a vehicle other than an 18T lorry is required, this will need to be booked in advance and a charge may apply
Our `Text Ahead' and `Ring Ahead' functions are available on most deliveries. For parcel providers, we offer `Text Ahead' only
Deliveries available via HIAB (Flatbed vehicle with crane) / with chapter 8 signage - require 48 hours' notice and extra charges may apply
We offer a 2-man delivery service, removal of packaging and a stair walker - these require 48 hours' notice and extra charges will apply
Mitsubishi Electric is an Associate Member of the Fleet Operator Recognition Scheme (FORS) and our dedicated fleet vehicles are FORS accredited to Bronze level
Collection is also available from our Milton Keynes warehouse - this must be pre-arranged and require at least 3 hours' notice
Returns to be notified within 30 working days - Terms and Conditions apply
MEHITS product deliveries are subject to alternate delivery arrangements - Terms and Conditions apply
Please ensure shortages or damages are marked on the delivery note and notified within 3 working days

Mitsubishi Electric Website, Document Library and The Hub

Website

For further information on any of our products and services please visit our website: **les.mitsubishielectric.co.uk** which has been designed to provide a detailed overview of the energy saving solutions we can provide you.

Document Library

Our website: **library.mitsubishielectric.co.uk** features all current operating and installation manuals, as well as product literature, case studies, CPD guides and more. There is no requirement for visitors to login to our sites to download the latest product and technical information. A document library app is also available allowing visitors to access this information simply from their tablet or smart phone.

The Hub - online content portal

The Hub is a new approach from Mitsubishi Electric which offers useful and informative comments and articles from both leading independent editors and technical experts on the issues affecting the built environment, please visit: **thehub.mitsubishielectric.co.uk**

e-Shop

Online ordering is available to all credit account customers across both Finished Goods (M Series and Mr Slim) and Spare Parts.

CPD Information Guides

Mitsubishi Electric is accredited by the Construction CPD Certification Service in many different areas, aimed at enhancing the knowledge of its customers and providing a view of the key issues facing our industry today. We have produced a number of Industry Information Guides that are available to download from our Document Library. We also run a number of CPD seminars and training courses across the UK. **To find out more, simply contact your local Mitsubishi Electric sales office.**
