Compressor Packing Notice PUHZ-W112VAA-(BS)

Before operation of the Ultra Quiet Ecodan, model PUHZ-W112VAA-(BS), all compressor packaging and feet fixings must be removed. The compressor is housed inside its own sound insulated compartment and utilises special packaging to minimise the risk of transportation damage. Failure to remove the packaging will result in vibration being conducted through the whole unit and the potential for the compressor to overheat, which can invalidate the warranty.
