Difference

Installation Summary

J D Wetherspoon invested £2M into The Cribbar in Newquay

The company is working towards a more environmentally-sustainable future

Lossnay can even provide The Cribbar with cool fresh air without the need for any air conditioning

The company is committed to driving down its carbon footprint and energy costs, whilst giving customers the perfect environment in which to enjoy a meal and a drink. Crucial to achieving this goal is a design with the best heating, cooling and ventilation system possible.

“Energy consumption is a necessary part of business but we take every opportunity we can to reduce ours, together with our carbon footprint,” said Jon Randall, Head of Developments and Acquisitions for J D Wetherspoon.

“The installation of energy efficient Mr Slim heat pumps combined with Lossnay heat recovery ventilation has helped us to meet both of these goals and offers us the added benefit of reduced running costs.”

During summer months Lossnay can even provide The Cribbar with cool fresh air without the need for any air conditioning.

When the outdoor temperature is lower than the indoor room temperature (typically in the spring time and during summer evenings), Lossnay will introduce fresh, cool air into the building and the air conditioning system can be turned off.
